NUROFEN

Superior efficacy and safety make Nurofen top of its class.

✓ **Headaches.** Nurofen has been shown to be superior to both 650 mg aspirin and 1000 mg paracetamol.¹

✓ **Period pain.** Due to its superior anti-prostaglandin activity Nurofen has been shown to be more effective than either aspirin² or paracetamol.³

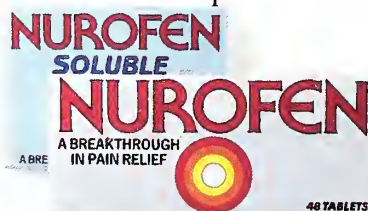

✓ **Dental pain.** Superior to paracetamol⁴ and aspirin⁵ and, unlike aspirin, doesn't exacerbate post-operative bleeding.

✓ **Cold and flu symptoms.** More effective than paracetamol,¹ superior antipyretic action compared to aspirin.⁶

✓ **Backache.** Anti-inflammatory, unlike paracetamol; and therefore provides better relief.⁷

✓ **GI tolerability.** As well tolerated as paracetamol, gentler on the stomach than aspirin.⁸

✓ **Overdosage.** Nurofen is rapidly absorbed and eliminated, does not accumulate, and is safer in overdosage than either aspirin or paracetamol.⁸

Comment

The Department of Health has finally written to the Pharmaceutical Services Negotiating Committee with the terms of the NHS pay settlement for community pharmacists in England and Wales for the period April 1, 1992 to March 31, 1993. *Chemist & Druggist* understands that these terms have been slightly modified following the Treasury ratification stage. The outcome is that PSNC will have to judge these when they meet on October 14.

Albeit that the Treasury has been somewhat overexcited by the sterling crisis, pharmacists will be hard stretched to forgive it for putting pharmacy on the back burner for over a month (see September 12 pp 435,436). If pharmacist contractors are altruistic, they could consider that the pound in the pharmaceutical pocket is largely dependent on the financial health of the nation—and just at the moment, the State and its professional servants have the look of those about to become impoverished! But they will remember that, too often, the Government has shilly shalled over remuneration settlements, presumably banking the interest on the monies that should have been paid to pharmacists from April Fools Day, and using it for some more pressing political cause.

In Comment of September 12 we alluded to the almost

annual Departmental conjouring trick of pulling a small cash rabbit out of the ministerial hat at British Pharmaceutical Conferences to appease the afflicted. Since Brian Mawhinney practised such pharmaceutical prestidigitation at Birmingham, the £1 million for waste disposal then announced, seems to have either been binned, or still to be in transit to needy pharmacists currently performing the service for free.

Pharmacists are now in a "Catch 22" situation on new roles. They have been warned by PSNC that it is no longer wise to loss-lead with such free services, because of the danger of remaining forever unpaid for such practices. Individual family health services authorities will divide and rule the profession at local level unless pharmacy takes a national stance on such issues. *C&D* understands the profession's new roles steering committee met at the end of August to set its course. Not only is the Minister waiting (September 12, p432), but so is the profession. That Committee must determine the "do-able" and the "payable" in the wider interests of tax-paying NHS patients. Pharmaceutical opportunities will run out at the same rate as the pound loses its value, unless the profession makes a potent and telling bid for residue.

Focus on finance at NPA Board

The National Pharmaceutical Association Board of Management has decided not to increase the annual subscription despite the continuing recession.

The economic situation, current NHS negotiations and other financial matters were at the forefront of the September meeting of the Board. Tim Astill, NPA director, assured the Board that every effort would be made to contain costs without any reduction in the current level service to members. As a result of a number of efficiency measures taken within Mallinson House, the telephone bill had been 25 per cent favourable against budget for the first six months of 1992.

Medicine packaging The Manufacturers Liaison Committee felt that many manufacturers designed their packaging without considering the problems faced by pharmacists. A "packaging protocol" was being drawn up to inform manufacturers of how they could help those at "the sharp end".

Waste management The board welcomed a proposal from the Department of the Environment, exempting pharmacists participating in DUMP campaigns from licence requirements.

Dispensing assistants for doctors The Board strongly and unanimously reaffirmed the NPA policy of not becoming involved in the training of dispensing technicians for doctor's surgeries. The dispensing technician certificate is intended

only for those who will work under the supervision of a pharmacist.

Security The Board agreed to the recommendation for a self-study course on security for NPA members, many of whom did not appreciate how much they might be losing by theft and other forms of shrinkage.

Test marketing through Boots It was agreed that representations should be made to a manufacturer who had test marketed a new product exclusively through Boots. It was felt that this gave Boots an unfair advantage over independent pharmacists.

Ostomy appliances Following a spate of complaints from

members about companies offering to supply ostomy equipment direct to the patient, the Board is to renew contacts with the Royal College of Nursing and to approach the Campaign for Impartial Stoma Care.

Laxative abuse The Board agreed to give full endorsement to the "Prevent Laxative Abuse Now (PLAN) Campaign" and were pleased to see that it included a proposal that laxative products should only be sold in pharmacies and personally by a pharmacist.

Hazardous products and child-resistant closures Concern was expressed that the Department of Trade and Industry have introduced regulations, for implementation

from November 1, requiring child resistant closures and fixed triangles recognisable by touch to be fitted to a wide range of products. These regulations had been introduced with little or no prior consultation, apparently because the Government had been threatened with legal action by the European Commission.

From November 1 any "very toxic", "toxic" or "corrosive" substance, as defined in the Packaging and Labelling Regulations, must be sold with a reusable child resistant closure. The tactile warning triangle must be affixed to products which are "very toxic", "toxic", "corrosive", "harmful", "extremely or highly flammable".

Scottish DT changes

In a letter to chemist contractors in Scotland, the Pharmaceutical General Council (Scotland) has listed Drug Tariff changes.

- Accutest blood testing strips (50, £12.43) were added to the Tariff on September 1.
- Items added to the list of zero discount products, with effect from October 1 are: Cyclosporin oral solution; Min-I-Jet; Neupogen (Roche) and Proleukin injection. Metrozol will be added to the ZD list on November 1.
- Guidelines were given for the correct endorsing of prescriptions for Imigran as several problems have arisen with the pricing of these prescriptions.
- Numerous amendments have been made to the pricing of incontinence appliances in Part 5 of the Tariff.
- The Pharmacy Practice Division has been instructed to continue to accept endorsements for October pricing for glibenclamide tablets 5mg.

Presentation marks final taskforce

PSNI vice-president Dr Willie Woodside (centre) presents Dr Ian Jones (left) and Professor Geoff Booth (right) with candlesticks and decanter at a small reception at the RPSGB headquarters in London on Monday

For the past 20 years an academic taskforce from Bradford has been making an annual weekend trip across the water to indoctrinate Northern Ireland pre-registration graduates in the intricacies of the Drug Tariff. Now, however, Professor Geoff Booth and Dr Ian Jones have decided, with some regret, it is time to retire.

To mark the occasion Pharmaceutical Society of Northern Ireland vice-president Dr Willie Woodside and secretary and registrar Derek Lawson made a special trip to London on Monday to present the academic duo with a crystal decanter and a pair of silver candlesticks.

Professor Booth paid tribute to Scholl Ltd who initially funded the venture and have continued to sponsor it over two decades. "I was a bit askance at the beginning because it was at the height of the troubles. But we saw it as a way of supporting our pharmaceutical colleagues, and they have looked after us very well," he said.

Northern pharmacists hear partnership theme stressed

Pharmacists should not abandon their scientific skills, warned Professor Sandy Florence, Dean of Pharmacy at the University of London. "It is a fact that pharmacists are scientists, not clinicians, and they should apply their scientific skills to clinical problems," he said.

Speaking at the inaugural symposium of the Northern Regional Drug and Therapeutics Centre in Newcastle upon Tyne, Professor Florence said that a multidisciplinary partnership is essential to ensure patients get the best deal.

It was a theme taken up by several speakers, who emphasised that pharmacists and doctors working together is the key to the Centre's success.

The breadth of expertise in a multidisciplinary team is the best way to tackle complex problems confronting the NHS, said Dr Jim Smith, Regional Pharmaceutical Adviser and Director of Pharmacy at the NRDTCC.

He pointed out that drug therapy is the major therapeutic approach to patient management in the NHS. "Quality, safety, efficacy and cost-effective use are therefore of enormous importance," he said.

The Government's White Paper, Health of the Nation, has targeted mental illness and cardiovascular disease as areas for improvement. "Rational prescribing is essential to the success of the Government's objectives in these areas," Dr Smith said.

Professor Folke Sjöqvist, Professor of Clinical

Professor Sandy Florence, Dean of Pharmacy at the University of London: "pharmacists should apply scientific skills to clinical problems"

Pharmacology at Stockholm's Karolinska Institute, said that it would soon be possible to provide GPs with a profile of drug metabolising enzymes for each patient, but manufacturers still favoured giving the same dose once a day to everybody.

The task facing clinical pharmacologists working with other professions is, he said, to ensure that the most appropriate drug is given to the right patient in the optimum dose at a reasonable cost.

Professor Florence pointed out that ultimate responsibility for patient care rests with the doctor, but nobody expects doctors to do or know everything. Pharmacists, are the "human factor" that links diagnosis to drug treatment.

"It's taken us a long time to realise that providing patients

with an appropriate drug is a process fraught with difficulty," he said.

The future for community pharmacy lies in embracing new technologies and new activities. The provision of medicines and advice; domiciliary care; diagnostic testing; and health education are all important roles.

However, Professor Florence noted, pharmacists' advice needs to be improved.

But now it is time for action and initiative, he said. The battle will be won not in specialist centres or in hospitals, but in community pharmacies.

"This is not a role that's being invented to give pharmacists something to do, nor is it to replace lost skills. But it has everything to do with patient need."

PAGB sets up Pharmacy Plan Group

The Proprietary Association of Great Britain has set up a Pharmacy Plan Group to help support pharmacists, who the Association sees as the "gate-keepers" to the NHS.

The move follows the announcement that the Association plans to target GPs with information about OTC medicines in an attempt to build brands (C&D June 27, p1126).

The Pharmacy Plan Group is chaired by Smithkline Beecham's David Crow, and includes two representatives from the PAGB, along with members from Crookes Healthcare, Intercare and Warner-Lambert.

The Group, designed to complement the GP strategy, will be on an on-going exercise, PAGB's Katy Fitzsimon told C&D.

Although detailed proposals were still to be decided, the Group's programme has gained support from the National Pharmaceutical Association and the Royal Pharmaceutical Society. Close collaboration with both organisations is likely.

In the long-term, the PAGB hopes to liaise with the RPSGB on undergraduate training and plans to co-host a seminar with the NPA in April next year, which will examine ways to develop the pharmacist as "gatekeeper".

In the meantime, the PAGB will be publishing a leaflet explaining the benefits of greater display of OTC medicines and will for distribution to independents.

Finally, as for doctors, PAGB is putting together an educational package for use by schools of pharmacy, to be piloted in 1993.

Government urged to provide more R&D funding

The Government has been urged to reverse the decline in state spending on scientific research in a new report, "Supporting the Science Base".

Reviewing the organisation and funding of scientific research, it concludes:

- The UK is bottom of an international league in terms of the proportion of higher education research and development (R&D) funding financed by the Government
- Total spending in civil R&D in the UK, as a percentage of gross domestic product, has remained static while every other nation surveyed has experienced growth.
- Perception of science and engineering professions has a strong influence on school subject choice. Sixth formers rated science teaching bottom in terms of status and salary

• The league tables for school science achievement in 15 countries places the UK second only to Hong Kong at age 18. However the position is reversed at age 14 where the UK ranks twelfth.

The report highlights the fact that the pharmaceutical industry is a major contributor to the British economy. A balance of trade surplus has been recorded every year for over 40 years and is projected to be in the region of £1.3 billion in 1992.

Dr John Griffin, ABPI director, said "Any failure on the part of the Government to provide sufficient funding for academic research hinders the search for new medicines, disadvantages patients and will, in turn, restrict the growth of one of Britain's few very outstandingly successful industries."

Charter awards

Three NHS units have been awarded the Charter Mark seal of approval under the Citizen's Charter. The awards were presented to Scarborough Hospital's outpatient department, Preston disambulation centre, and United Bristol Healthcare trust.

ACE inhibitors

Sales of ACE inhibitors are predicted to rise from 30 per cent of the antihypertensive market to 61 per cent in 1995, making them the best-selling antihypertensive therapy.

"The US Market for Antihypertensive Therapy" also predicts a fall in beta-blocker sales from 12.6 per cent to 7.3 per cent. Sales of calcium channel blockers are expected to remain static.

Hib campaign

To support the launch of the new Hib vaccine the DoH and Health Education Authority have launched a £1.25m campaign to raise parents'

awareness of the dangers of Hib infection. The campaign includes television and Press advertisements and a leaflet for parents which can be displayed in the pharmacy.

Charities approach

The Government has welcomed a call for standards of service from 25 of the UK's major neurological charities. The group, which includes the Alzheimer's Disease Society, British Migraine and Epilepsy Associations and the Parkinson's Disease Society, calls for more efficient, carefully targeted use of neurological care resources.

Oxford Charter

Oxfordshire FHSA has published a Patients Charter, laying down standards which the FHSA will meet in its dealings with the public. It also mentions "good practice" for patients such as cancelling appointments that are not required and making sensible use of out-of-hours services.

Homoeopathy advice unreliable says CA report

Shops selling homoeopathic remedies, including pharmacies, are giving unreliable advice concludes the Consumer Association in the October issue of *Which? Way to Health*.

Which? was told by the Royal Pharmaceutical Society that most pharmacists selling "classical" remedies — single ones meant to be sold with leaflets or advice — aren't trained to give advice.

Most homoeopaths consulted by the magazine were happy with

the off-the-shelf remedies. However, the products were let down by the standards of advice and labelling which came with them.

• A large report in the same issue focussed on vaccinations for children. *Which?* says that parents are not being told enough about the potential risks of immunising their children. All vaccines can have side-effects and the CA says parents should be told of the risk/benefit ratio so they can make informed decisions.

• Drug trials and case histories of patients who took part in such trials are discussed in another article, "Are you a human guinea pig?". Although few patients take part in drug trials without giving permission, they may not be told everything they need to know, warns the Association.

RPSGB's Roger Odd says although pharmacists do not have specific training in homoeopathy many have an interest and are in the British Homoeopathic Association.

Generic substitution case adjourned

The case of a Bedfordshire pharmacist charged with dispensing generic cimetidine against a prescription for Tagamet was adjourned by the Royal Pharmaceutical Society's Statutory Committee last week.

John Sandbach, of 31 High Street, Arlesey, is said to have dispensed Cox's cimetidine when prescriptions clearly called for Tagamet. The alleged offences were discovered by inspectors in March 1991 after complaints from a member of the public.

Following investigations, proceedings were taken against Mr Sandbach under Section 85 of the Medicines Act "for supplying medicines which were labelled in such a way as to falsely describe the product".

Mr Sandbach appeared before Biggleswade Magistrates Court on February 20 when he pleaded guilty to two summonses arising out of the investigation and was given a conditional discharge.

In addition to the two offences, an inspector noted a dispensed item which was standing upon a prescription for Brufen. "The tablets dispensed did not bear any markings and had the appearance of being a generic ibuprofen," said Mr Hill.

Although the product was not handed to a patient and Mr Sandbach said the error would have been rectified, the facts indicated that generic substitution may not have been isolated to the cases taken to court, said Mr Hill.

New Cabinet Committee for health

A new Cabinet Committee, especially devoted to health has been set up to help implement the targets set out in the Health of the Nation White Paper.

The strategy is being supported by three working groups: the first, under Minister for Health Dr Brian Mawhinney, is dealing with the wider health aspects while the second, under the chief medical officer Dr Kenneth Calman, is helping to monitor and develop the initiative by advising on the epidemiology, monitoring and health outcomes. The third group, under NHS chief executive Duncan Nichol, is

overseeing implementation in the NHS.

Virginia Bottomley, Secretary of State for Health, says the Department of Health is planning to reach wider audiences through a new Health of the Nation newsletter, the first of which will be published in the Autumn.

A network of regional co-ordinators has been set up "to provide strong local leadership for implementation". To support this process, Mrs Bottomley has decided to hold a series of conferences starting in the New Year. She and her ministerial colleagues will be visiting every

region to listen to what the NHS and local organisations have to say about health strategy.

Mrs Bottomley referred to the key role of professionals working in primary healthcare and sees primary healthcare as "the major NHS setting for delivering the aspirations of the Health of the Nation".

• Total community care finance for England in 1993-94 will be £539 million. Initially, the money will be "ring-fenced", announced Mrs Bottomley, to ensure that it goes where it is intended — "to help some of the most vulnerable in our society."

Delegates from all over the world gathered at Mallinson House last month for "Pharmintercom 92", an international meeting of senior representatives from community pharmacy organisations in Australia, Canada, New Zealand, the Republic of Ireland, South Africa, the UK and the USA. The delegates discussed the state of pharmacy, remuneration and professional developments in their respective countries. A group photograph was taken on the steps of Mallinson House to mark the occasion. Back row (l to r): David Sharpe, PSNC; Brian Jacobson, Pharmacy Guild of New Zealand; David Pleaner, South African Association of Retail Pharmacists; Godfrey Horridge, PSNC; David Boyce, South African Association of Retail Pharmacists; Stephen Greenwood, Pharmacy Guild of Australia; Colin Johns, Pharmacy Guild of Australia; Bill Scharringhaus, National Association for Retail Druggists; Enda Ryan, Irish Pharmaceutical Union; Gary Köhn, South African Association of Retail Pharmacists; Stephen Axon, PSNC. Middle row: Jim Matthews, Pharmacy Guild of Australia; Tony Walsh, Irish Pharmaceutical Union; Leroy Fevang, Canadian Pharmaceutical Association; Donald Moore, National Association for Retail Druggists; Joe Moss, National Association for Retail Druggists. Front row: Ernest Stefanson, Canadian Pharmaceutical Association; Sheila Tait, Pharmacy Guild of New Zealand; Joe King, NPA; Tim Astill, NPA; Colette McCreedy, NPA and Gert van der Vyver, South African Association of Retail Pharmacists

A new lease of life for your BNF

The new edition of the British National Formulary is now available but don't throw away your old copy just yet!

Over the past five years, almost 50,000 copies of recently outdated issues of the BNF have been collected from hospital and community pharmacies and sent to developing countries by the Commonwealth Pharmaceutical Association.

AAH Pharmaceuticals Ltd will collect copies of the 22nd (turquoise) and 23rd (mustard) issues during Commonwealth Pharmaid week (November 2-6).

Pharmaid is recognised as one of the most practical ways of improving information on medicines in developing countries and enabling health professions to use medicines rationally, says the CPA.

Glaxo sponsors disposal campaign

All 64 pharmacies in Northumberland are taking part in a FHSA-organised DUMP campaign that will run from October 12 to November 6. It is being sponsored by the pharmacy division of Glaxo.

Northumberland Waste Regulation Officer and Northumberland LPC provided guidance for the initiative to help reduce the numbers of accidental poisonings.

Families and householders are being encouraged by the FHSA to hand in old, unused and out of date medicines to the pharmacists who will see that they are destroyed under environmentally friendly conditions.

Last year in Britain, nearly 1,700 people died from unintentional poisoning by stored, unsafe and medicinally ineffective old drugs. Northumberland FHSA says the number of documented cases of children mistaking medicines for sweets is steadily rising.

"Some people do already hand in their old, unused and out of date pharmaceuticals and we thank them for it, but there are still many more who could help remove these potentially dangerous substances from the home," said Mr Peter Bower, chief executive of Northumberland FHSA.

Pharmacy Healthcare focus on condoms

During October and November the Pharmacy Healthcare scheme is running a campaign to raise awareness of male and female condoms, both for contraception and as part of safer sex.

The leaflet, "A guide to male and female condoms", was written by the Family Planning Association and includes detailed descriptions of how to use both types of condom. Details of organisations that can provide further information on contraception and HIV infection are also included in the leaflet.

There will be a national launch event complemented by Press and media publicity at local and national level.

Pharmacy Healthcare intend starting 1993 with another campaign on solvent misuse. This will be followed by a No smoking campaign during February and March.

Lederle fail to sustain pharmacists with Sustets

With every recent delivery from my wholesaler I have received a rough photocopied letter from Storz Ophthalmics (Lederle). This missive exhorts me to make note of an important change, as the product licence of Diamox Sustets is to be withdrawn from October 1 to be immediately replaced by their new formulation of Diamox SR 250mg. It then strongly suggests that I run down my stocks of Diamox Sustets in readiness for this event, and refer for reassessment any patients presenting with Sustet prescriptions.

So far, so good, but nowhere in Lederle's letter is there a mention of what the company intends doing about residual stocks of Diamox Sustets after October 1.

This is a preparation I rarely use, so the probability of "running down stocks" is remote, but I do hold a complete pack of 30 at a cost of £11.54 on my shelf.

This change of formulation has been made to achieve better control for the patient. With my co-operation any affected patient will not be put at risk, but I fail to see why I should suffer financial loss as a result. Lederle should

immediately send out a postscript to their letter to inform pharmacists of their arrangements for full credit return or, the direct exchange of old Sustets for new SR.

Forgery — the new computer art form?

Computer-generated prescriptions are rapidly superseding all hand-written prescriptions, and whereas the dangers of interpretation may soon be a problem from the past, the lack of familiarity with the prescribers hand writing may itself pose an even bigger threat.

Recently a particular entrepreneur in London has been producing computerised prescriptions using a genuine doctor's address, and attempting to obtain drugs of high market value, presumably for resale at a handsome profit in the twilight world of soft drug abuse. This particular attempt has been identified, and pharmacists alerted, but if the original forger is not caught quickly a simple change of drug, doctor's name and signature, will perpetuate the problem.

I would not wish to turn the clock back and have all prescriptions handwritten, but this potential for disaster requires urgent action. The drugs of abuse are easily identified — falling principally into the categories of benzodiazepines, opiates and anabolic steroids — and should be reclassified as Controlled Drugs with relaxed storage and record requirements.

CD regulations impose on the pharmacist an absolute responsibility for ensuring the prescription is genuine. This responsibility is onerous, but must be accepted as urgently necessary before a properly organised criminal campaign floods the black market with drugs obtained by the use of indistinguishable computerised forgeries.

Boots steal a test march?

Last week Boots announced the launch of the first quantitative, home cholesterol test, and this week it was the subject of a large advertisement in the national Press.

When Chemcard was launched I welcomed the principal of properly marketed, accurate home cholesterol tests, but I am now unable to be a party them. Boots have once again stolen a march on other community pharmacies selling their test while, as yet, I have not even been offered the new, but still qualitative, Chemcard for assessment.

Surely with all that technical expertise in the pharmaceutical industry, built up by years of research into pregnancy test kits, there is a competitive cholesterol test available for the independent market?

Malaria — right advice

The number of requests I receive each year for chemoprophylaxis against malaria continues to grow, and is an area where a pharmacist's counselling responsibilities are vital. These drugs are available over the counter so as not to restrict their availability, but the number of cases of malaria reported in the UK each year continues to rise.

This was highlighted recently by the death of Richard Hughes, brother of Liberal Democrat MP Simon Hughes, who contracted the disease while in Kenya. A tragic case which highlights the virulence of this killer disease.

Whenever I sell antimalarials to travellers, I not only emphasise the importance of the dosage regimen, but also that of taking precautions against being bitten. Unfortunately, even when taken properly, drugs are not 100 per cent guarantee against contracting malaria, and advice on the use of insect repellents, and knock-down sprays and nets, is essential for the ever more intrepid traveller. This counselling also provides me with a welcome, year-round opportunity for selling products which used to be restricted to our own short, and unpredictable, Summer season.

Topical REFLECTIONS

Scriptspecials

Logiparin

Novo Nordisk have introduced Logiparin (tinzaparin sodium), a low molecular weight heparin. Trade prices are: 5 x 2,500 i.u. £18.50; 10 x 3,500 i.u. £49.50, and 5 x 4,500 i.u. £24.75. **Novo Nordisk Pharmaceuticals Ltd. Tel: 0293 613555.**

Mintec available

Novex Pharma says Mintec (peppermint oil) is available again through the usual distributor, Farillon. **Novex Pharma. Tel: 0491 578171.**

Respascal tablets

UCB Pharma have launched Respascal tablets, each containing 2mg tulobuterol hydrochloride. The product is available in packs of 60, trade price £12.85. **UCB Pharma Ltd. Tel: 0923 248011.**

Salbutamol syrup

On Monday, Lagap are introducing salbutamol syrup. The trade price for the 100ml pack size is £0.46. **Lagap Pharmaceuticals Ltd. Tel: 0420 474427.**

Zithromax changes

Richborough Pharmaceuticals' broad spectrum macrolide antibiotic Zithromax (azithromycin) has been granted a short course paediatric licence. This allows a reduction in the recommended treatment duration for children from five days to three. The shorter course and once daily dosing is likely to improve compliance, says the company. Pack sizes are unchanged. **Richborough Pharmaceuticals, Division of Pfizer Ltd. Tel: 0304 616161.**

Ramysis 100mg

Isis Products have introduced Ramysis 100mg (doxycycline) capsules (50, £20.54 trade). **Isis Products Ltd. Tel: 0772 628311.**

Stoma cap in Tariff

The Convatec System 2 stoma cap is available on the Drug Tariff from October 1. The cap should be placed at the end of the System 2 closed section. **Convatec Ltd. Tel: 0895 678888.**

Dicapen

Leo Laboratories say the Special Reporting Directive is no longer required on Dicapen, so the black triangle symbol may be removed. **Leo Laboratories Ltd. Tel: 08444 7333.**

Typhim Vi

Merieux UK Ltd have confirmed that prescriptions for Typhim Vi are authorised for payment. **Merieux UK Ltd. Tel: 0628 785291.**

BM-Accutest

Boehringer Mannheim say there are 50 strips per container of BM-Accutest (£12.30) and not 30 as previously informed (*C&D*, Sept 26, p548). **Boehringer Mannheim UK. Tel: 0273 480444.**

Plesmet to Link

Link Pharmaceuticals have taken over the marketing and sales of Plesmet Syrup; all orders should be forwarded to distributor Farillon as usual. **Link Pharmaceuticals Ltd. Tel: 0403 272451.**

RU486 revised

Roussel Laboratories' medical abortifacient mifepristone (RU486) can now be prescribed to smokers under the age of 35 years, following a revision of its contra-indications by the UK licensing authority. **Roussel Laboratories Ltd. Tel: 0895 834343.**

More Careline straps

From October 1, patients can obtain more than one pair of Pharma-Plast's Careline Community Leg Bag Straps on the Drug Tariff. **Pharma-Plast Ltd. Tel: 0527 64222.**

Ciproxin extends

Bayer say that Ciproxin is now indicated for the long-term treatment of chronic infections extending beyond two months duration. The company recommend that treatment with the drug should be continued for at least three days after the signs and symptoms of the infection have disappeared. **Bayer Plc. Tel: 0635 39000.**

MEDICAL MATTERS

Cancer treatment limits side effects

A new cancer treatment that could enable higher doses of conventional cytotoxic drugs to be given with fewer side effects is soon to go on trial in humans.

Dr Will Steward, senior lecturer and consultant in medical oncology, The Beatson Oncology Centre, Glasgow, explained to a Press conference in London this week that although tremendous advances had been made in treating cancers over recent years, the biggest problem with chemotherapy was its toxicity to bone marrow. Cytotoxic agents failed to distinguish between bone marrow cells and tumour cells, both of which are rapidly dividing.

The new technique involves inhibiting the bone marrow prior to chemotherapy then stimulating blood cell formation again using growth factors.

A compound known as stem cell inhibitor has been shown to protect bone marrow cells in rats whose death rate decreased when they were later given chemotherapy. It is hoped that human trials of the compound

will start next year.

Another bone marrow inhibitor, tetrapeptide, is to start clinical trial in a few months time.

Dr Steward said that although much work had to be done on the new regimens they seemed to offer exciting prospects for the patient's outlook. Trials on growth factors such as granulocyte-macrophage colony stimulating factor (GM-CSF) and granulocyte colony stimulating factor (G-CSF) had already shown that these compounds enabled higher, more effective doses of chemotherapy to be given with fewer adverse effects on blood counts. The new bone marrow inhibitors could usefully complement this approach and further reduce patient morbidity.

One major problem would be cost, as these compounds were expensive, said Dr Steward. His cancer unit restricted the use of G-CSF to those patients with curable cancers who had experienced blood problems with previous chemotherapy and those who had had bone marrow transplants.

Another major advance in cancer therapy during the past two years was the development of the serotonin antagonists such as ondansetron which had dramatically reduced the incidence of nausea and vomiting related to chemotherapy. But again there were cost problems - Dr Steward said this drug accounted for half his chemotherapy drug budget.

He went on to describe a technique to limit hair loss, another common side effect of chemotherapy. This involved keeping the scalp cool, thereby reducing the flow of blood and cytotoxic compounds to the hair follicles.

Dr Steward thought that the future for cancer treatments lay in the biological approaches which encouraged the body's own defences to attack cancerous cells. These defences could be the reason for the sudden unexpected clearance of tumours. For this reason he would never tell cancer patients what their chances of being alive in, say, six months would be. "There is never no hope for cancer," he said.

Avoid the hot tub in pregnancy

Hot baths or saunas in the first trimester of pregnancy may increase the risk of foetal neural tube defects such as spina bifida, according to research published in *JAMA* (1992, 268, p882).

The prospective study involved 23,491 women who underwent either amniocentesis or serum alpha-fetoprotein screening. Some 5,566 women had exposure to at least one heat source during early pregnancy.

Exposure to either a sauna, hot tub, or fever led to a risk of neural tube defects 2.2 times that of women without heat exposure.

Hot baths appeared to have the strongest effect with a relative risk of 2.8 after adjusting for maternal age, family history, folic acid supplements and other heat sources. This compared to a risk of 1.8 following sauna or fever.

These results could be explained if risk is related to an increase in core temperature, probably the highest after a bath. The overall risk rose to 6.2 after two types of heat exposure.

The authors say that heat has been found to be teratogenic in other mammals and this may also apply to humans. However, they stress the need for further studies.

RAFTING AGENTS DON'T GET TO THE CORE OF THE PROBLEM.

Unlike rafting agents, Asilone neutralises excess acid, the cause of indigestion and heartburn.

The balanced formula of Asilone Liquid provides triple action: quick and lasting relief of indigestion, heartburn and wind (Asilone contains dimethicone, an effective treatment for flatulence). By contrast, rafting agents and many antacids offer little relief from wind.

Asilone is also extremely low in sodium which makes it suitable for people on low-sodium diets – unlike most rafting agents and many other antacids.

These are some of the reasons why doctors prescribe Asilone. And why you should recommend it for indigestion, heartburn and wind.

Asilone[®]

Available only from pharmacies.

Relieves the symptoms
by treating the cause.

Asilone Liquid Each 5ml contains dried aluminium hydroxide BP 420mg, light magnesium oxide BP 70mg, activated dimethicone 135mg

Counterpoints

Harmony given protective benefits

Elida Gibbs have relaunched their Harmony range with new protective formulations, complete repackaging and additions to the range.

Complete with the new 'Protectives' sub-brand name, the range has been designed to give protection during styling through the addition of protein, conditioner and a sunscreen.

Products in the range include Harmony Hairspray, Fixing Spray Plus, Extra Hold Mousse, Gel Spray and Creme Gel, all in a choice of variants and packaged in the eye-catching purple livery.

The Fixing Spray Plus, available in normal/fine and dry/damaged hair variants, has a new adjustable spray button which allows the user, with a simple twist, to choose between a narrow jet spray for direction spot styling or a wide mist spray for all-over styling and hold.

The three hairspray variants have also been reformulated, with a superfine, dry spray, while a new 'anti-frizz hold' variant, designed to help condition dry ends and flyaway hair, has joined

the stable.

A new television advertising campaign, scheduled to break in November, will support the Harmony Protectives launch. Building on the 'is she or isn't she' Harmony campaign, the £4 million spend will also introduce a

new advertising line 'Style to perfection with added protection'. Elida Gibbs Ltd. Tel: 071-486 1200.

Win a trip to Paris

Unichem have teamed up with Procter & Gamble to offer pharmacists the chance to win a flight to Paris on Concorde.

There are two trips to be won, plus a travel bag for every pharmacist placing an order.

To enter pharmacists need to order eight packs from the Oil of Ulay range — four from group A and four from group B on the special order form, then answer five questions.

The Oil of Ulay range is on price promotion, with 150ml Beauty Fluid regular at £30.67 (12) and 150ml Beauty Cleanser at £8.26 (six).

The prize includes rail travel to London, two nights at the Sheraton Heathrow, one way flight to Paris on Concorde, with return on a scheduled flight. Unichem. Tel: 081-391 2323.

Active conditioning with Cream Silk

Active Leave-In Styling Conditioner is the latest addition to the Cream Silk range from Elida Gibbs.

Designed to break new ground offering 'two in one' conditioning and hold, Active Leave-In Styling conditioner is dispensed from a pump into the hand and smoothed through the hair, without the need to rinse out.

Enriched with Pro-Vitamin B5, the conditioner penetrates the hair shaft to protect, nourish and strengthen the hair, say Elida Gibbs.

The major launch is being supported by a £250,000 women's Press campaign, designed to explain the product's

benefits to consumers.

The new product is designed to attract users of regular conditioners and will enhance profitability, say Elida Gibbs, by its premium prices positioning versus the market average for a 350ml conditioner which has an equivalent use up rate.

Available in two variants, one for dry, permed or coloured hair and the other for normal, fine and flyaway hair, the conditioners are available in 100ml pump action dispensers with a recommended retail price of £2.25. They are packed in outers of sixes. Elida Gibbs Ltd. Tel: 071-486 1200.

Omega 3 display

Wassen International are supporting their new Omega 3 fish oil capsules with a special offer for pharmacists.

The Jenks Group will be offering a display unit containing ten 60 capsule packs (£3.55 each) for the price of eight. The Jenks Group. Tel: 0494 442446.

Cymex campaign

EC de Witt are backing Cymex with Press advertising and sampling throughout the Winter.

Advertising will appear in national daily and Sunday papers until February and samples will be offered in women's magazines. EC de Witt. Tel: 0928 579029.

Unipath are offering consumers the chance to win a holiday worth £2,000. By purchasing a double-test pack of Clearblue One Step, consumers can enter a competition to win a holiday — the choice of destination is up to the winner. Pharmacists and assistants can win a six-piece set of Antler luggage worth £350 when they display the competition showcard and shelf edger with entry forms attached. The winning pharmacy will receive a maximum of five sets of luggage. Closing date is January 8. Unipath. Tel: 0234 347161

Puppet offer with Farley's Meal Timers

Crookes have launched an on-pack promotion for their Farley's Meal Timers range.

Consumers will be offered colourful hand puppets for £4.99 plus four proofs of purchase per pair, or £7.99 and seven proofs of purchase for a set of four. Packs of Farley's Meal Timers will be flashed to highlight the offer.

The set comprises four different puppets, the Farley lion, duck, bear and rag doll, all made from quilted cotton. Crookes Healthcare. Tel: 0602 507431.

One Coat Almay mascara

Almay have introduced Colour Performance One Coat mascara.

It is a fibre-free, lash building mascara said to give longer, fuller lashes with just one coat. It is smudgeproof, long-lasting and contains beeswax. Retailing at £6.95, it comes in five shades — black, brown/black, brown, sapphire and slate. The mascara is lanolin-free and ophthalmologist tested.

Almay are supporting the launch with a £1 off discount on the new mascara and also Colour Performance Conditioning mascara (now £6.50). The offer runs for eight weeks from October 21. Sara Lee Household & Personal Care. Tel: 0753 523971.

Free Olvarit offer with baby clothes

Cow & Gate have linked up with Adams Childrenswear in a sampling exercise for Olvarit.

The promotion in 256 Adams stores offers a free Cow & Gate Olvarit babymeal or baby juice to customers who spend more than £5 on clothes in the 0-6 months age range.

It runs until the end of this month.

In addition some 100 customers will have the chance to win flowers for a year in an Olvarit competition. Entry forms are available to consumers with the free Olvarit product. Cow & Gate. Tel: 0225 768381.

Vantage look to boost PoS success

Vantage have introduced a new shelf reserver to accommodate the Vantage Top Offers shelf barkers.

Available via the AAH Pharmaceuticals branch

network and costing £10 per pack of 20, the shelf reservers have been designed to ensure that the Vantage PoS remains crisp, clean and professional in its presentations. AAH Pharmaceuticals Ltd. Tel: 0928 717070.

Leichner have introduced gift packs of their lipsticks and nail polishes. Called Colour Creation kits, they comprise three co-ordinated duos: Red Stilettos lipstick and Bloody Mary nail gloss; Dreamboat lipstick and Bubble Gum Pink nail gloss; Backstage Bronze lipstick with Glistening Ginger nail gloss. They all retail at £3.75. They are available in outers of three at £11.25. Network Management. Tel: 0252 29911

Klorane gets body building addition

Pierre Fabre have extended their Klorane haircare range with the addition of a 2 in 1 shampoo.

Klorane Detangling shampoo with Hop Flower (200ml £3.95) is said to add body to hair as well as cleanse and condition it. The shampoo and conditioner is suitable for all hair types and mild enough for frequent use, say Pierre Fabre Ltd. Tel: 0865 742525.

Soothing herbal teas

A new range of herbal and fruit teas has been launched bearing the name of Dr Malcolm Stuart, a leading herbalist.

The range comprises eight botanical and fruit teas including Chamomile, Peppermint, Elderflower, Vespers, Tranquillity, Apple and Blackberry, Strawberry and Raspberry, and Mediterranean Citrus.

The Vespers tea has been prepared to help restless sleepers and

contains lime flower, valerian root, hops and passion flower.

Tranquillity is said to be a soothing blend and contains lime flower, hawthorn berries and yarrow.

Vespers, Tranquillity, Elderflower and the fruit teas are priced at £1.35 for 20 sachets and the Chamomile and Peppermint teas at £1.09 a pack. East India Co Ltd. Tel: 081-686 8917.

Actibrush offer

Colgate-Palmolive are running a special offer on Colgate Actibrush.

Until the end of November a combination pack of 250ml Actibrush

with a diamond-head toothbrush is available at a saving of £1 to the consumer.

Colgate-Palmolive Ltd. Tel: 0483 302222.

Unichem have added Odourless Garlic Perles to their own label supplements range. Packed in a yellow flip-top container, each pot holds 30 2mg capsules. Throughout October, they will be available at a discounted price — a pack of six will cost £3.96 (rsp £1.39 each). Point of sale material is available. Unichem. Tel: 081-391 2323

Prepare to be dazzled.

Liquid centre Soothers for Halls

Warner-Lambert Confectionery are launching Halls Soothers, a new range of medicated sweets which the company says have a real fruit liquid centre with the power to soothe a sore throat and clear a blocked nose.

The cherry or blackcurrant flavoured medicated sweets will be available in packs of ten sweets retailing at 39p.

The launch of Halls Soothers will be supported by a £2 million advertising campaign, running throughout the 1992/1993 season.

Additional marketing support will continue throughout this season with extensive trialing of both variants. Warner-Lambert say by attracting new users and

encouraging repeat purchase, Halls Soothers look set to match the success of Halls Menthollyptus.

The company says independent research, conducted on its behalf,

has revealed that the natural fruity taste of Halls Soothers was preferred to any other liquid medicated confectionery currently available. **Warner Lambert Confectionery. Tel: 0703 620500.**

Tampax goes Compak

Tampax Compak is a new, premium priced tampon from Tambrands.

The new product is a plastic applicator tampon which remains compact for carrying around but which extends to a standard-sized applicator offering users easier, more comfortable insertion, says the company.

Tampax Compak is available in packs of 16s in two absorbencies —

regular and super. Modern packaging communicates this new line extension on shelf and distinguishes it from the existing flushable applicator range.

"Tampax Compak offers users the optimum in discretion and convenience and for those women who may have experienced difficulties with tampon insertion, it is the answer," says **Tambrands Ltd. Tel: 0705 474141.**

Philishave on TV

Philips are capitalising on the pre-Christmas surge in sales of shavers with a television campaign for Philishave.

Part of their £7 million spend on the brand this year, the campaign is "designed to maximise on the fact that over 50 per cent of men's electric shavers are gift purchases by women", say Philips. Called "For the man inside" the advert will be shown during November and December. **Philips DAP. Tel: 081-689 2166.**

Special offers from Vantage

AAH Pharmaceuticals are running a special offer on Vantage stationery.

Members ordering six outers of the small prescription bags will save 15 per cent on six outers, 17.5 per cent on ten outers and 20 per cent on 15 outers. Carrier bags are also on offer. The discounts run until November 6.

AAH are also running an offer on their own label photographic film. Deal A offers member three free films on order of three or

more outers (30 films). Deal B offers seven free films in return for order of five or more outers (50 films).

Products included in the deal include the Vantage 11-100 ISO (24); 135-100 ISO (24); 135-100 ISO (36) and 135-200 ISO (24). **AAH Pharmaceuticals. Tel: 0928 717070.**

Unichem on the road

Unichem have taken their pharmacy systems — Unipos and Mediphase — on tour. The company is offering pharmacists the chance to have a demonstration of the system during afternoon or evening sessions.

Pharmacists who attend the roadshow and decide to purchase a Unipos system, Unichem will give a discount, of at least £500, off the normal price.

The venues and dates for the roadshows are: Metropal Hotel, Padstow on October 14, Posthouse Hotel, Bournemouth on October 15, Posthouse Hotel, Croydon on October 20, Posthouse Hotel, Peterborough on October 21, Posthouse Hotel, Cardiff on October 27 and Posthouse Hotel, Reading on October 28. **Unichem. Tel: 081-391 2323.**

Witch Doctor

EC de Witt are supporting their Witch Doctor and Witch Stik brands with Press advertising and sampling until the end of the year. Advertisements will appear in 19 different magazines, which will be backed by sampling. **E.C. de Witt. Tel: 0928 579029.**

Soft & Gentle

Colgate-Palmolive are running a special offer on Soft & Gentle throughout this month. Aerosols will hold 25ml extra free and roll-ons 20 per cent extra free. Pharmacists can order the products through Unichem, Numark and AAH. **Colgate-Palmolive. Tel: 0433 302222.**

Hosiery offer

Bear Brand are offering consumers a free pair of opaque knee highs with the November issue of *The Clothes Show* magazine. The company has added a run-resistant range, Nine Lives, which includes 10 denier tights, semi-opaque tights and knee highs. **Hartstone Hosiery. Tel: 0623 558228.**

Poly changes

Henkel Cosmetics are taking over the sales and marketing for their Poly range of haircare products, currently distributed by Warner-Lambert. Henkel will be distributing the products with effect from November 1. The company will no longer distribute the Sergio Tacchini range, which will now be available through Diana Da Silva Ltd. **Henkel Cosmetics. Tel: 081-804 3343.**

Swains offers

Swains have compiled a range of photographic special offers for Christmas. They include a free teddy bear with each Minolta Riva AF352 camera, a free Kodak E180 video tape with every GS 135-24 100 ASA twin pack of film and a free music cassette with every Kodak Fun Flash camera. Full details from the company. **Swains international Plc. Tel: 0485 533393.**

Dixel offers

British Tissues are relaunching their Thick and Fast kitchen towels with new packaging and two new designs. They are offering a Kitten calendar with packs of Dixel Kittensoft toilet tissue. Consumers collect tokens from the special pack and send them off with £1.50 for p&p. **British Tissues. Tel: 081-864 5411.**

Jackel have introduced a cot sized hot water bottle for babies and toddlers. Available in deep pink it holds a litre of water and meets all British safety standards, says the company. It measures 8in by 6in and retails at £1.79. A covered version, featuring a teddy design, is available at £7.99. **Jackel International. Tel: 091-250 1864**

Brightening up Christmas

AAH Pharmaceuticals have introduced Bright Lights Junior Torches. Available in three designs, the torches come with two Duracell batteries and have an easy-to-hold shape.

Pharmacists can order a pre-pack, containing six

Colour Pocket Torches and Six Junior Torches, at a trade price of £26.26 (rrp £51.48). Individual prices are £4.59 for the Colour Pocket Torches and £3.99 for the Junior Torch. **AAH Pharmaceuticals. Tel: 0928 717070.**

Introducing GMTV. Britain's Brightest Start.

From January 1 next year mornings will never be the same again. Britain will switch to GMTV on ITV for its brightest ever start to the day. Each morning we'll deliver a dazzling array of celebrities, show biz, lifestyle, sport, family and women's interest features, for a glittering mix that's both informative and entertaining. In any one month, 50% of the population and 66% of housewives with children tune into Breakfast TV on ITV. And with a sparkling £2.5 million advertising spend for the launch of GMTV we're confident we'll attract even more. So if you want your products to shine out in the market place, call Olive Crouch on 071 837 7101 to find out more. Sunglasses on!

GMTV, London Television Centre, Upper Ground, London SE1 9TT.

In the extended role lifeboat

Scanners which read prescriptions and computers which check them will reduce the skilled professional's involvement in dispensing to almost zero. No wonder we see the extended role as a lifeboat for a sinking profession, says Guernsey pharmacist J.B. Paige

One of the most talked about topics in pharmacy of late has been "the extended role". If you believe some of the reports the extended role will secure the future of the profession, once someone agrees to pay for it.

Pharmacy, in roughly the form we know it, came into existence just over 150 years ago (we all have the mementoes to prove that). Since then the duties of the pharmacist have not changed radically. Those of us serving the community still dispense prescriptions, sell medicines and give advice on minor ailments just as our predecessors did.

For a century and a half, pharmacy has evolved, mostly in response to changes in working practices stimulated or forced on us by advances in technology. Industrial production of unit-dose forms, advances in packaging and the availability of computers have all affected the way we work. New medicines have had a profound impact on the effectiveness of the service we offer.

It seems to be the sum of the changes resulting from new technology which has now brought pharmacists to seek new areas in which to exercise the skills and knowledge acquired during a long and arduous education.

In the 1950s, responsibility for the manufacture of medicines moved from the local pharmacies to central factories, making many of the pharmacist's technical skills redundant. During the last decade we have seen the locally held expertise on medicines, their actions, reactions and interactions supplanted by databases maintained by specialist software houses. Over the next few years even the simple mechanical function of counting tablets will be replaced by original dispensing packs.

Take a box from the shelf. Ask a computer about the medicine and the patient. Get the printer to produce a label. Collect a tax for the Government. Is this really a fulfilling and cost-effective way to make use of an expensive (and in Britain a rare) scientific education? Soon we will even have scanners to read the prescriptions (five years, maximum!) so our involvement in dispensing will be almost zero.

No wonder pharmacists see the extended role as a lifeboat for a sinking profession. As such, perhaps we should give it wider and deeper consideration than has so far been the case.

J.B. Paige: calculating the cost of the extended role

The extended role. Extended from what? I think most pharmacists mean by this any activity other than dispensing prescriptions. In hospital pharmacy, one of the most promising new activities has been clinical pharmacy, which has given pharmacists renewed job satisfaction and provided a valuable service to doctors of

great benefit to patients.

Yet clinical pharmacy has been an integral part of community pharmacy for at least the last 150 years. The local chemist has always given advice on the best use of medicines for the treatment of minor ailments. Recent legal changes have allowed a rapid expansion in the range of

conditions which can be treated by patients with the help and advice of their pharmacist. Clinical pharmacy is an extended role which is a traditional part of community pharmacy, which is rapidly expanding in scope and which can give real professional fulfillment. Yet few pharmacists seem eager to apply themselves to this field. Why?

The problem appears to be the same one which dogs all the proposed new extended roles for pharmacists. Payment. Why would a pharmacist spend five minutes selling a pack of tablets for perhaps £2.35 when two or three prescriptions with an average value of £7-8 could be dispensed in the same time?

Of a typical £2.35 retail price for a P medicine, 35p is VAT which goes to the Government, £1.40 goes to the supplier and only 60p remains in the pharmacy. 60p for five minutes equates to a charge-out fee for pharmacists of £7.20 per hour, from which all overheads, including wages of ancillary staff must be deducted.

Perhaps more importantly, prices for P medicines are calculated on virtually the same basis as those for GSL packs except that there is sometimes an additional 10 per cent profit margin. (or 14p in my example above) to cover the legally necessary involvement of the

Ever wondered why you've never served a sloth with a sleep problem?

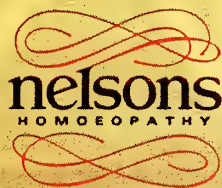

Now there's something you don't see every day. Wild animals sloping into your shop and asking for something to get them through the night. Proof that, when it comes to getting a good night's sleep, Nature provides the best solution.

And, when your bleary-eyed customers come in to ask your advice, why not recommend a natural, homoeopathic medicine whose active ingredients are perfectly safe for everyone.

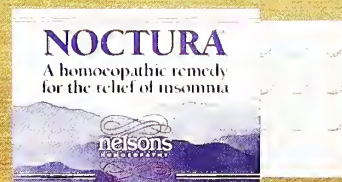

Like Noctura from Nelsons.

What's more, last year's *30 per cent sales growth* - backed by the new blister pack design and high profile advertising campaign - means interest, and therefore sales, are set to rocket. And when they do, the 40 per cent margin guarantees a huge profit potential.

So, next time, recommend the natural answer to insomnia. Recommend Nelsons.

IT'S ONLY NATURAL

Cutex

pharmacist in the sale of a P medicine. If it takes only two minutes of a pharmacist's time to supervise the sale of a £2.35 P medicine he or she earns £4.20 per hour by doing so. For all the excrement of male bovines exuded by the representatives of patent medicine manufacturers the actual value those companies place upon the time of their retail colleagues is less than £5 (gross) per hour. Is it any wonder then that many pharmacists prefer to stay in the relative security of their dispensaries rather than suffer the slings and arrows of outrageous customers for £5 an hour!

Government has shown a marked reluctance to place any real value on the time spent by pharmacists in any extended role. This attitude is hardly surprising when the profession has meekly accepted a pitifully low payment for the one extended role it already has. Until we place a realistic value on our own time in an area which we do (or should) control, how can we expect others to do so?

If I call in a plumber or an electrician he supplies the materials needed to carry out the work and puts his own mark-up onto the price he has paid for them. In addition he charges me a charge-out rate for his own time and for that of any other workers employed on the job. From memory I would say something like £12 an hour is usual for a tradesman here in Guernsey.

Most professionals (and remember, we do consider ourselves to be professionals) charge for their time at hourly rates of perhaps £30-70 depending what they think we will pay without undue complaint. Only opticians, like pharmacists, charge for their time through a percentage on top of the cost of goods supplied. By my calculations spectacles and contact lenses attract a mark-up of anything between 500 and 1,000 per cent.

The fee pharmacists charge for the time they spend advising customers on the use of medicines does not in any way relate to the fees charged by architects, dentists or opticians. It is much closer to (but not always as high as) the fee charged by a supermarket for the preparation of packed fruit or veg. Can we as a profession really be surprised if the public see us and value us in the same terms as grocery shops, rather than as "real" professionals?

If the leaders of the pharmacy profession believe in an extended role they must first ensure that a proper fee structure exists for each new activity. Before this can be done some sense of sanity and order must be brought to the one existing extended role. Pharmaceutical manufacturers have set and enforce the margins on the products they supply, which cover adequately

the costs of retail distribution, but really take no account of time spent by pharmacists advising on the use of their products.

It is for the profession through the Royal Pharmaceutical Society, the PSNC, the NPA, the Company Chemists Association, the Cooperative Chemists Association, the NAPD, and/or any combination of these bodies, to set and enforce a scale of fees for the remuneration of pharmacists for time spent advising on the use of P medicines.

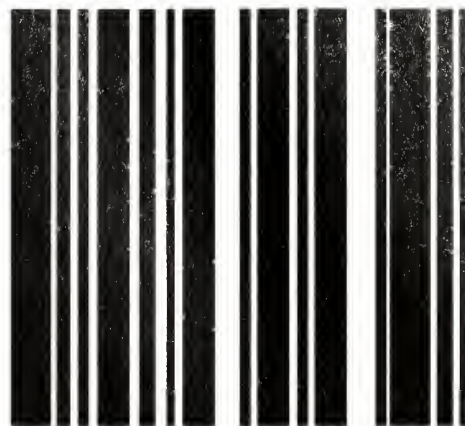

I would suggest as a simple starting figure that an additional £1 (plus VAT) should be added to the price of all P medicines for this purpose. At the rate of one intervention every two minutes (at least as fast as anyone could manage) that would still only put a charge-out fee of £30 per hour on the pharmacist's time, surely still amongst the lowest of all professions.

I do not believe that the law of diminishing returns would apply if all P medicine prices were uplifted by an extra £1. All the evidence of my own experience tends to show that people have more respect for products at £5 than pharmacologically equivalent ones at £2. For instance, try telling Mrs Average that a 500g pot of Aqueous Cream will remove her make-up at least as well as that 25g tube of Creme de l'eau from Laboratoire Evoins de Paris at £6.50.

According to a recent article in another journal (P.J. 29 August 1992, p260), there are currently 11,953 pharmacies in Britain of which 8,843 are independent or groups of six or less. Even if a large proportion of pharmacy trade is now in the hands of a few major multiples, the profession of pharmacy in the community is still represented overwhelmingly by small businesses.

Harmonisation of EC rules on pharmacy ownership could threaten the future of individual pharmacies in some European countries. On the other hand, it might just as easily clip the wings of the UK multiples.

If the EC does provide a stimulus to small pharmacies in Britain and the profession adopts a more realistic attitude to the value of its members' time, our profession may yet have a future worthy of the aspirations of those yet to graduate from the schools of pharmacy.

The Harrods of wholesaling

For much of its existence this century the medical division of Philip Harris has been seen something of a Harrods of wholesaling; a Rolls Royce company providing a premium service with an almost haughty old-world grandeur. But as Philip Harris celebrates their 175th year with a series of fundraising events, they have clearly developed and are continuing to develop into a modern and rapidly expanding corporation.

Flying wagons

Chairman and managing director of Philip Harris Medical David Linney explains the genesis of the Midlands-based company.

"In 1817 a surgeon by the name of Thomas Ellis set up in the Birmingham Bull Ring and, in 1825, an apothecary by the name of Philip Harris set up nearby. Harris came from a Herefordshire family — his parents ran a horse and cart distribution company, 'The flying wagons'. Philip Harris started furnishing the surgeon with medical supplies and soon had expanded the business to include many of Ellis's professional colleagues. Because of the transport background in the family, Philip Harris had the expertise to grow this new commercial activity into a national business."

Though the company went into manufacturing in the 1930s, this side of the business closed in 1973 with the introduction of tougher controls on production. The company no longer makes fireworks, either.

Otherwise, the story is one of consolidation and growth, becoming a limited company in 1867 and developing a separate scientific and educational division. Today it regards itself as a national company, although Mr Linney admits that most of the business is "south of a line from North Wales to the Wash".

The company has expanded into new areas over the years. Mr Linney explains: "When Philip Harris went into occupational health at the turn of the century it was very much a cinderella industry." But it was an opportunity because of demand from the local Cadburys factories and it has developed into an important part of the modern company.

Family spirit

The management structure, too, has changed over the years. "The thread of family

As Philip Harris celebrate their 175th year with a series of fundraising events, crowned by a visit from The Princess Royal, Business Editor Zack Goldring reviews the development of this venerable company and looks for signposts to its future

David Linney, chairman and managing director of the medical division (left), Roger Brown, sales and marketing director (centre) and Ray Short, retail director

ownership was broken at quite an early stage. First a stepson took the company on, but the company has been run by professional managers for over 100 years now." Nevertheless, the company still has the spirit of a family business, insists Mr Linney.

In 1963 it was recognised the company was essentially two separate businesses, and was split into Philip Harris Medical and Philip Harris Educational and Scientific. "Then both halves moved out of Birmingham in different directions." Philip Harris Medical moved out to Stirchley, at the edge of Birmingham. In 1981 the company was floated as a plc.

Medical is by far the larger of the two divisions, with a turnover of some £51.3 million last year compared to the educational and scientific division's £27.8m.

"Since 1963 we have simply been expanding the business in the medical division," says Mr Linney, "but currently there are relatively low margins in wholesaling and we have been looking elsewhere to maintain them at acceptable levels." So in the past three years the company has been developing a pharmacy retail division — arguably a return to its roots.

Retail chain

Today the company has 15 shops, to which the company self distributes 65 to 70 per cent by value. "But we do utilise other independent wholesalers, such as Graham Tatford and Sants of Stoke."

"Pharmacy is a contra-cyclical business. The only cloud on the horizon is the possibility of an increase in the clawback."

Inter alia, Mr Linney believes the premiums paid for pharmacies may have reached a

peak: "I don't believe either AAH or Unichem are paying the kind of price they were paying two years ago."

Philip Harris have principally gone for urban shops where they believe there is growth. "We are looking at a 50 mile radius of Birmingham to buy pharmacies in decent urban areas." The businesses trade as Philip Harris, "but you can't see it over the door; we endeavour to retain the original names".

With a retail development manager now in place, development of the retail chain is very much from the centre outwards. "We are looking towards the professional type of chemists shop, stocking rehab aids, offering counselling and the full range of drugs. There is not so much focus on toiletries and hairsprays."

Mr Linney is not a pharmacist

Continued on p660

Continued from p659

himself, and the company's current superintendent pharmacist, Michael Dixon, was previously pharmacy manager at the company's Long Eaton store. Mr Linney sees the pharmacy chain reaching a maximum of no more than 25 stores "in the foreseeable future".

The company also operates a substantial occupational health business — "an area currently heavily in recession". Nevertheless, the company has recently introduced a retail stand of rehabilitation aides for the pharmacy, as a step forward from the still commonly used catalogue system on offer elsewhere.

Business backbone

Philip Harris Medical have their own computer programming division. "We are the only independent, alongside Unichem and AAH, to develop our own software," asserts Mr Linney. The software programmes, which are largely for stock management and ordering, has been sold by other wholesalers, and the company also did all the software development for the Glaxo agency scheme.

But the backbone of the business remains wholesaling. "We are the largest independent wholesaler now," says Mr Linney. Recently the company added Folidays, based in Trowbridge, to the wholesaling business, and Mr Linney admits that expansion by acquisition is part of the current company strategy. "We are developing a policy of satellite stockholding depots; Folidays was an opportunity we had been looking at since 1988. There are synergies with our activities in the south west."

The company aim to have the satellite system, with a maximum of four subsidiary

The Sutton fun run. In the foreground is Alan Walters, chairman of the 175 Charity Fundraising Committee

depots in place, operating by 1993.

Mr Linney is sufficiently aware of the pharmacy profession's sensibilities not to want to emphasise the company's dispensing doctors' business. "It is a historical thing, going back to the foundation of the company," he says. "They are just another NHS contractor as far as we are concerned." However, he is proud of the fact that Philip Harris are "probably the number one suppliers of equipment to doctors", including computer systems. The company has been celebrating its 175th

anniversary throughout the year. The events have taken the form of fundraising exercises in areas where the company and the staff have an established interest. "For instance, one of our staff has cystic fibrosis, while another's mother recently died from motor neuron disease."

Helping hospice

Also, Philip Harris have traditionally supported the local children's hospice and the lord mayor's "Children in the cities 92 charity," says marketing and sales director Roger Brown.

A target of £10,000 has been

set by the company, which will back the money raised pound for pound.

Both staff and management have set about the challenge with a will. Some £4,500 has already been raised through quiz nights, race nights (where films of racing are used to take bets with the profits going to charity) and a record 92 strong entry into the 10 mile Sutton fun run.

Nuns on the run

Philip Harris' employees certainly entered into the spirit of this last event, running dressed as nuns, and in the men's case, nurses.

On a social level, the company organised a fundraising family day out at Shenston, near Litchfield, with bouncy castles, clowns, a barbecue, plus displays of what this £80m turnover company does.

One fundraiser expected to be a particular success has been the brainchild of David Linney's secretary, Christine Smith. She has organised the compilation of a 175 entry recipe book which the company have produced and printed themselves. "We are hoping to raise £5,000 with this," says Mr Brown. "The main bulk of the proceeds will go to cystic fibrosis."

The book is more than just a collection of homely cooking; the Roux brothers have given permission to reprint their cocktail lists.

The Lord Mayor called to meet the oldest and youngest of the company's employees, but the highlight of the year so far, without a doubt, was the visit of the Princess of Royal, in recognition of the year's charitable activities. Mr Linney and Mr Brown have still to get over it.

Crookes Healthcare and the trade – winning partnerships, building business, reaping success

Crookes Healthcare has risen to prominence as the UK's leading healthcare company over the past few years. This has been achieved through a potent combination of effective business management, first class service to the company's trade customers, inspired new brand development and successful acquisition.

In terms of service to the trade, the company has a recognised long term commitment to their pharmacy business partners. This commitment has clearly paid off for Crookes Healthcare in allowing the company to enjoy long-term market dominance, but the spin-offs for the trade are marked.

Pharmacy backing

First among these is the continued backing and co-operation pharmacists have received from Crookes Healthcare. This is both in terms of the support pharmacists have received for their unique professional role, providing an ever-increasing range of services, medicines and health related products, as well as for their standing as business operators.

Kevin Wilson, managing director of Crookes Healthcare comments: "Given the continued recession, we are aware that recent trading conditions have not been easy for many. At Crookes Healthcare we have both continued to introduce new levels of service, and maintained our investment in

Kevin Wilson, M.D. of Crookes Healthcare.

developing and promoting our product portfolio. We strongly believe that there are significant opportunities on which we can work closely with our trade partners to build our mutual standing in community healthcare, and achieve new levels of success.

"For example, the development of the OTC market will necessitate closer working relationships between pharmacist and manufacturer if the full potential for self-medication and the extended role of pharmacists is to become a reality," he says.

"As the UK's leading healthcare company, Crookes Healthcare are the natural first-choice business partner for pharmacists throughout the UK. Our full, involved and committed support can assist our pharmacy customers to

achieve their full business potential."

Status changes

New opportunities are about to present themselves for the pharmacist to promote the business and to realise individual potential as a vital member of the primary healthcare team.

The introduction of proposed EEC regulation will mean that from December this year, the pharmacist is recognised as a healthcare professional. This will then pass into law from June 1994. This change will bring the trade in line with the rest of Europe, where the pharmacist already enjoys this professional status.

In terms of other EEC proposals which may affect the trade, nurses will also be permitted to take responsibility

for the prescribing of certain drugs, particularly more routine medications on repeat prescriptions.

These fundamental changes will re-define responsibilities among healthcare professionals working in the community and this, together with the closing down of many NHS clinics, will result in both a re-evaluation and extension of the pharmacist's role.

"The pharmacist will be working more closely with midwives, health visitors, community nurses and general practitioners as part of a cohesive healthcare team" says John Edwards, Crookes Healthcare's national sales manager. "A correct understanding of the role and responsibility of each of the members of the team is essential in order to promote

company's continued success and invests in other areas which will offer the pharmacist the service and back-up needed to manage the business efficiently and profitably.

A major re-shaping of sales support has successfully combined customer services and order processing into Customer Care, and linked this with the pricing section. Both areas now fall under the overall banner of the Sales Desk, with customers now benefiting from a more streamlined department with immediate access to highly trained staff who deal swiftly with any order or inquiry.

Crookes Healthcare's commitment to the trade, and to providing customers with the best service in the marketplace, led the company last year to invest in a brand new fleet of aerodynamic trucks and hand-picked team of drivers who have been trained to deal with basic queries and to relay any more detailed queries back to the Sales Force.

Following this through, the appointment of a new distribution manager, Chris Lumb, at Sandiacre, just outside the company's HQ in Nottingham, ensures that Crookes Healthcare brands move into the trade efficiently.

Sandiacre's workforce of 140 staff operate from a site half the size of Wembley Stadium to ensure that the task of processing and delivery pharmacists' orders is carried out as efficiently and as quickly as possible. Today 98 per cent of all orders are delivered within 5 working days.

Quality service

A determination to provide an unrivalled service means that quality is uppermost in the minds of Crookes Healthcare's Warehouse and Distribution operation, recently achieving BS 5750 registered status. This new British Standard is a third-party independent audit of a company's quality assurance systems, increasingly important in a highly competitive marketplace in which only the highest standards are acceptable. Crookes Healthcare was credited for recommendation for BS5750 as a hallmark of the excellence of the company's service in July.

Keeping retailers ahead

This level of service is mirrored by comprehensive Sales Force activity, and encompasses good communication between Retail and Medical Sales Forces to ensure effective cross flow of information and to highlight strengths of hospital usage for example of RTF OsterMilks which in turn allow the pharmacist to maximise new opportunities.

Similarly, Trade Marketing Manager Gerard Fremlin is concerned to ensure that the pharmacy retailer, given the increasingly sophisticated and competitive nature of retailing in the 90s, is well placed to respond to a variety of challenges. Space planning to

Crookes Healthcare's
Brand leaders.

Crookes Healthcare's new Headquarters.

Farley's forges forward.

prioritise the highest rate of sale of products in the space available, is just one area in which inquiries from pharmacists from throughout the UK are received.

Training programmes

Many pharmacists and their counter assistant staff have felt the weight of Crookes Healthcare's support behind the counter. An extensive range of responsible and helpful literature is freely available from Crookes Healthcare's Sales Force, and this is frequently translated into practical advice in the form of pharmacy staff training, with an on-going programme of staff training evenings throughout the UK. These staff training evenings cover key pharmacy brands and their related healthcare issues, such as E45 and the problem of skincare, Farley's and the nutritional needs of babies, together with Nurofen encompassing pain relief.

One of *Chemist and Druggist's* more recent seminars on the subject of Pain Relief was sponsored by Crookes

Healthcare (C&D, pXX). Entitled 'From sex to Saturdays', the seminar covered the topics of Headaches and Migraine.

Three speakers addressed pharmacists and their assistants, Dr Mike Smith explained what causes the different types of commonly occurring headaches; Consultant Neurologist Dr John Blau, also joint honorary director of the City of London Migraine Clinic, took the audience through his own approach to diagnosis, and Dr Anne MacGregor explored OTC treatments for migraines and headaches as well as the ingredients in common remedies.

Crookes' news flow

Pharmacy staff training evenings, such as these, provide Crookes Healthcare with the opportunity to keep pharmacy customers abreast of issues of the day. Crookes Healthcare is well placed to maintain this flow of information as the company is an active member of healthcare industry organisations, both in the UK and in Europe. Additionally the company publication, 'The Leader', provides Crookes Healthcare with a useful platform to ensure that pharmacists and their staff are kept up-to-date and well informed.

Crookes Healthcare actively support the trade in terms of other educational initiatives, and has this year already sponsored two *Chemist and Druggist* Pharmacy Guides on Babyfeeding and on Skincare which are designed to act as useful reference guides for the pharmacist and pharmacy assistant.

Moving ahead

Inevitably, a close working relationship rooted as it is in sharing and in mutual advantage and profit has evolved between Crookes Healthcare and their pharmacy retail customers.

Crookes Healthcare's Kevin Wilson admits, "Success is very much a two-way process, and we are fortunate, as a company, to work with a great number of far-sighted and dedicated pharmacy retailers. Certainly we have enjoyed dynamic success over the past ten years so much so that the dramatic growth of the company is now necessitating a move to new headquarters in Nottingham but our aim remains constant and consistent improvement in all areas.

"It's an ethos which is shared with many of our pharmacy customers, and we believe that it is this which propels the winning partnerships between Crookes Healthcare and the trade to build business and reap further successes."

close and productive working relationships".

Crookes Healthcare will be actively involved with the National Pharmaceutical Association and other trade bodies in the sponsorship of educational material which compliments this transition, encourages understanding of the roles of each of the members of the healthcare team, and actively enables the pharmacist to realise the new business potential this represents.

Sales pack profit

Another area in which pharmacists have come to rely on Crookes Healthcare is in the provision of consistent record-breaking and profitable sales. A 20 per cent overall increase in sales in 1991 is all the more impressive in view of the fact that key brands have shown real growth in both sales and market shares. Crookes Healthcare's dedication to being the premier marketing-led company of profitable consumer brands which provide human well-being is illustrated by: the growth of brands such as Farley's OsterMilks by 30.7 per cent and an increase of market share to 13.8; the unique E45 with a 27 per cent sales growth; Optrex's performance with a growth of over 10 per cent; Sweetex with over 12 per cent growth, with Nurofen, Crookes Healthcare's home-grown flagship brand,

Kevin Wilson and John Edwards, National Sales Manager, with Crookes Healthcare Brand leaders.

John Edwards, National Sales Manager, juggling sales success.

achieving a 20 per cent growth.

Other examples are the outstanding performance of coldcare brands Strepsils (up by 20 per cent) alongside the recently acquired Dequa range, together with Karvol. All three are well-represented household names with strong consumer franchises in pharmacy.

They confirm the trade view that Crookes Healthcare have an exceptional understanding of the consumer, and markets brands in line with consumer expectations.

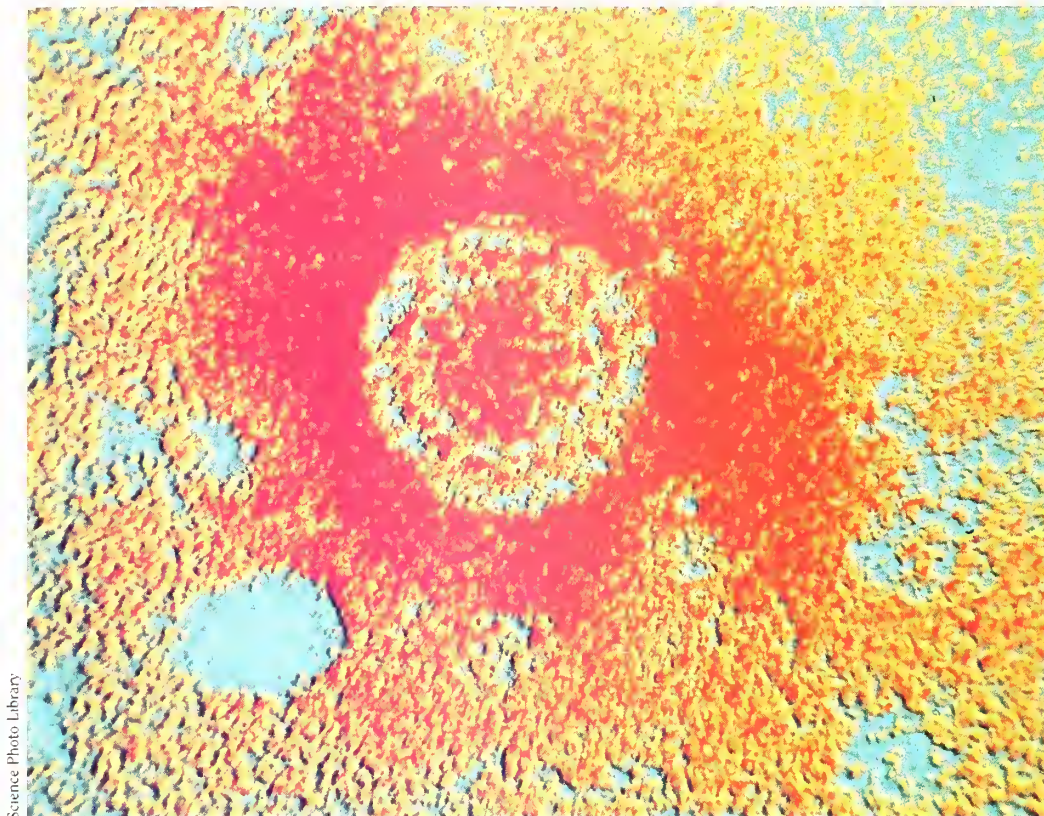

Future investment

Crookes Healthcare is the leading supplier of many of Britain's biggest healthcare brands, and much of this success is due to consistent investment in the brands in terms of promotional support. Heavyweight advertising, impactful packaging and tight targeting of advertising and public relations activities have all contributed to the company's standing as pioneers of new and effective methods of communication with health professionals and consumers alike. During 1992, Crookes Healthcare will invest £29 million behind their brand leading portfolio.

The best service for the best customers

But Crookes Healthcare also see their retail partners in the trade as key influencers of the

In the wake of launch activity in the hepatitis vaccine market, *C&D* examines the causes, treatment and prophylaxis of inflammation of the body's largest solid organ.

Science Photo Library

The fight against hepatitis

Recent media attention surrounding the case of liver transplant girl Laura Davies is a reminder of how important this organ is.

The wide variety of functions performed by the body's largest organ (excluding the skin) include: the metabolism of drugs and alcohol; synthesis of proteins, carbohydrates and fat; detoxification of foreign molecules and metabolism of cholesterol and phospholipids, and bile; and the storage of glucose (as glycogen), vitamins A, B12 and D, and trace minerals such as zinc, copper and iron.

Anatomically, the liver comprises left and right lobes, the right lobe being roughly six times larger than the left. Liver cells (hepatocytes) are grouped in lobules. The various metabolic processes occur as blood from the hepatic portal vein or hepatic artery comes into direct contact with the mitochondria and endoplasmic reticulum-rich hepatocytes as it flows through the liver.

Hepatitis — an inflammation characteristic of widespread damage to the hepatocytes — has now been shown to be caused by one of, so far, five

hepatotropic viruses, other viruses such as Epstein Barr and cytomegalovirus, alcohol and some drugs. Viral hepatitis can be further subdivided into acute and chronic presentation, and these will be considered separately.

Viral causes

The signs and symptoms of acute viral hepatitis are generally similar, regardless of the actual virus subtype involved, although the symptoms of hepatitis B are usually more severe. Specific diagnosis usually requires serological testing.

Hepatitis A virus: The virus which causes hepatitis A (HAV) is known in only one serotype throughout the world. HAV is an enterovirus-like RNA virus, which is highly infectious and is spread by direct or indirect faecal-oral contact. Blood and secretions are also possibly infectious.

It is highly prevalent in the developing world; in some countries over 75 per cent of adults have antibodies and most school age children have contracted it, though most infections are sub-clinical or unrecognised.

In Europe, transmission is usually through contaminated

water, though male homosexual practices make the infection more common in this subgroup. The infection can also be contracted by eating poorly cooked shellfish which has been exposed to the virus in sewage outfalls.

Incubation time is typically one month and an infected person will excrete the virus in the faeces for up to a fortnight before symptoms appear and for a week or so afterwards. Clearly the body fluids of HAV-infected patients should be handled with care, and prevention of further spread of the virus remains a mainstay of "treatment".

Hepatitis B virus: (HBV) consists of an infective particle (the "Dane" particle) which has an internal core antigen (HBcAg) surrounding the viral DNA and an outer surface coat antigen (HBsAg). A subunit of HBcAg known as the "e" antigen (HBeAg) is readily detectable in the serum of carriers and is used as a marker of the degree of infectivity and likelihood of progression to chronic disease.

HBV infection is spread permucosally through sexual contact and parenterally through the sharing by drug abusers of infected needles or

by transfusion of contaminated blood products. It can also be transmitted from mothers to their unborn children.

Chronic carriers provide a reservoir of infection in the population; in some areas of the Far East more than 10 per cent of the population may be carrying the virus. The incubation period for hepatitis B is typically two to three months.

Hepatitis C virus: (HCV) is one of two viruses now identified as being responsible for what was once known as "nonA nonB" (NANB) or "post-transfusion" hepatitis. As its former name implies, HCV is transmitted parenterally and has an incubation time of around two months.

Serotypically, it may be related to the yellow fever virus. HCV is thought to be responsible for up to 90 per cent of post-transfusion hepatitis episodes.

Hepatitis D virus: (HDV) is also known as the delta agent, and is a defective RNA virus that requires the presence of HBV for replication. Transmission is usually by the parenteral route and for this reason drug addicts are most at risk; the incubation

Continued on p666

Continued from p665

period is typically five weeks.

Prevalence of HDV varies; epidemics of severe HDV hepatitis have been seen in South America, Central Africa and the Middle East.

Hepatitis E virus: (HEV) is the other virus identified as a previous cause of NAND hepatitis. HEV is, like HAV, transmitted by the faecal-oral route. UK cases are usually found to be people who have recently returned from the Far East or Africa.

Acute viral hepatitis

There must be few diseases where the clinical signs can be so diverse, ranging from what appears to be a bout of flu to complete (and therefore fatal) liver failure, depending, among other factors, on the immune status of the individual.

Early signs of acute viral hepatitis include malaise and headaches, possibly with nausea, upper abdominal pain, fever and anorexia. Smokers may suddenly develop a distaste for their cigarettes. An urticarial rash may occur, particularly in HBV infection. Up to a week later the patient may experience a darkening of the urine and the whites of the eyes begin to show the characteristic yellowing of jaundice.

At this stage there is usually some relief from the early symptoms. Jaundice typically peaks within a couple of weeks, then fades over a further month. During this phase liver tenderness is common and the organ is usually enlarged. Spleen enlargement occurs in up to a fifth of cases.

Liver function tests will reveal

serum amino transferase levels up to 5000 per cent of normal. An increased prothrombin time is a pointer to severe illness.

Fulminant hepatitis is a rare condition, usually caused by HDV (though HCV infection and drug side-effects are also known precipitators), in which there is rapid deterioration and coma often within hours. Internal bleeding is common and is caused by massive liver damage which results, paradoxically, in a reduction in liver size. Renal failure often develops alongside and at this stage prognosis is extremely poor.

Treatment

There is no specific treatment for acute hepatitis, other than general supportive measures. Patients should avoid alcohol, but there is some dispute about the need to confine them to bed. Appetite is likely to return after the first few days and no dietary restrictions are thought necessary after this time.

Acute hepatitis prognosis is good, particularly in HAV infections. Most sufferers recover after a four to eight week illness. Progression to chronic hepatitis is rare, though a third of patients may suffer relapses.

Hepatitis B is generally more serious, particularly in the elderly, where mortality can be as high as 15 per cent. As many as one in ten patients become carriers of the disease, suffering in varying degrees from mild, persistent hepatitis to chronic active hepatitis and cirrhosis. HCV translates into a chronic state in 50 per cent of cases.

Chronic hepatitis

Persistent inflammation of the liver for more than six months is defined as chronic hepatitis.

Chronic persistent hepatitis features continuing raised serum aminotransferase levels and liver tenderness but may be otherwise asymptomatic. No treatment is required and the disease, which may persist for years, eventually resolves.

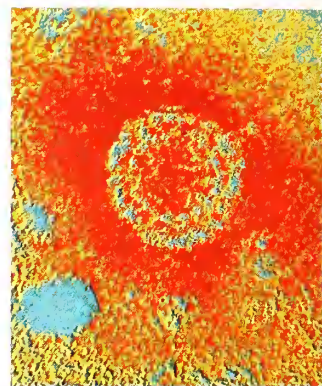

The symptoms of chronic active hepatitis are usually mild — malaise, fatigue and abdominal discomfort — until spleen enlargement and the characteristic signs of cirrhosis occur. These signs are spider naevi, fluid retention in the peritoneal cavity (ascites), and hepatic encephalopathy characterised by confusion, and slurred speech. Both HBV and HCV are known to cause chronic active hepatitis.

In chronic HEV infection, detected by the presence of serum HBsAg and usually confirmed by biopsy, some 20 to 40 per cent of patients will progress to cirrhosis after a period of a few years suffering from the uncomplicated disease, perhaps with recurrent exacerbations. During this time, the disease should be monitored and spread prevented by patient education and protection of close contacts by vaccination (see later).

Prolonged HBV infection can lead to carcinoma, particularly in men, so sufferers should be regularly screened. Alpha foetoprotein is a measurable tumour marker while ultrasound can be used to identify small tumours.

Chronic HBV infection responds poorly to corticosteroids, indeed viral replication may be promoted, so they are now contra-indicated.

However, 50 per cent of patients respond to interferon-A treatment, and it is indicated for patients who

are HBsAg and HBeAg positive and who have serum aminotransferase levels more than twice normal.

A typical schedule is 15-30 million units a week in divided doses for three months. Patients with advanced cirrhosis are unlikely to respond.

HCV can also cause chronic hepatitis; diagnosis is confirmed by the presence of antibodies to HCV. The proportion of patients progressing to cirrhosis is similar to that for hepatitis D. Interferon-A can again be effective — the usual dose is 10 million units a week in divided doses for six months, although relapses are common.

Before interferon, corticosteroid treatment included prednisolone (30mg per day) alone or in combination with azathioprine. Again, relapses were common.

Drug-induced hepatitis

Some drugs cause a hepatitis reaction that is indistinguishable from viral hepatitis. They include isoniazid, methyldopa, phenytoin and the anaesthetic halothane and closely related compounds.

Isoniazid can be a particular problem because onset can be delayed by up to a year. The risk with halothane is related to repeated exposure at short intervals.

These hepatitis reactions should be distinguished from other hepatotoxic drug reactions.

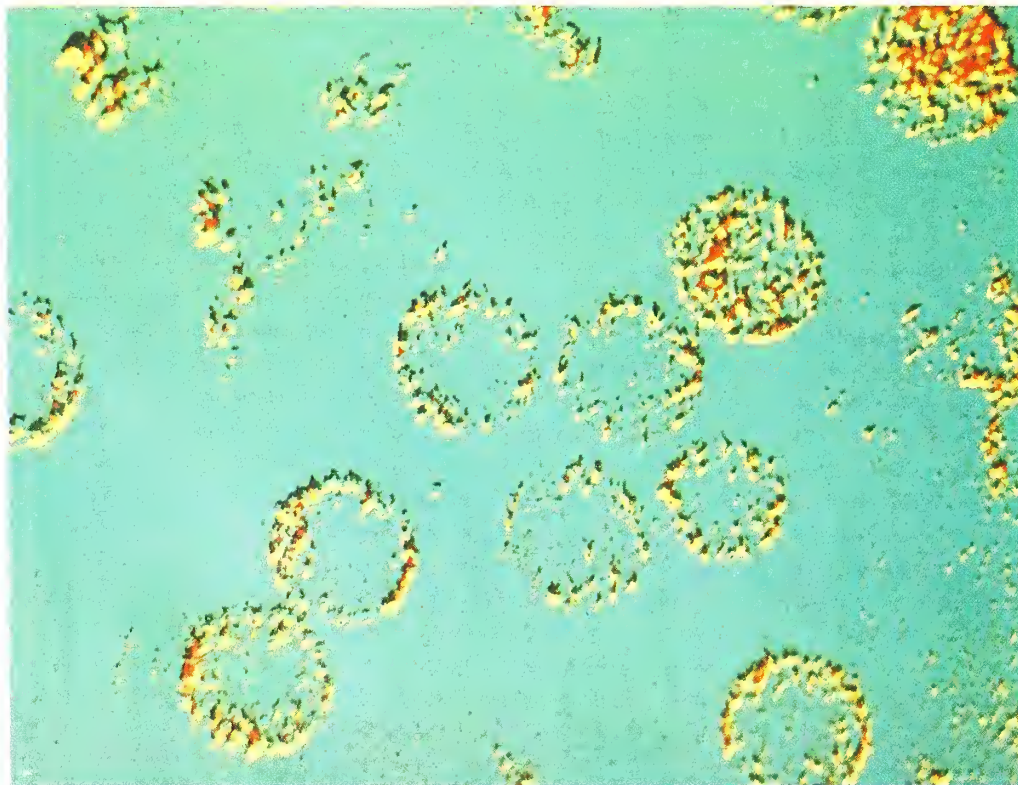

Paracetamol causes a dose-dependent fulminant hepatic failure due to the depletion of glutathione, which is vital in the detoxification of paracetamol where it binds harmful metabolites.

Phenothiazines including chlorpromazine, chlorpromamide and tolbutamide, and erythromycin estolate impair the secretion of bile (cholestasis).

Prevention

While personal hygiene helps prevent the spread of hepatitis A, the prevention of HAV infection has moved forward this year with the launch in April of the first hepatitis A vaccine: Havrix, from Smithkline Beecham (see Script Specials, April 4).

The formaldehyde-inactivated vaccine is prepared from the HM175 strain of the

Science Photo Library

False colour transmission electron micrograph of the ineffective "Dane" particles of the hepatitis B virus

EVERGREEN

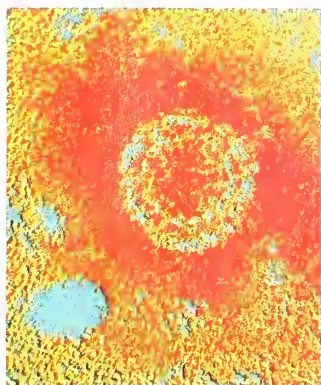

Effico is now more popular than ever with your customers; pharmacy sales of this distinctive green coloured tonic have grown by 14% over the past 12 months¹.

Effico is the only tonic which contains an appetite promoter as well as 'B' vitamins, to provide an effective pick-me-up when feeling tired, run down or convalescing after illness.

Available in an economical 500ml or handy 300ml bottle, there's more choice for your customers and more profit potential for you.

And with 56% of sales from pharmacy recommendation², your continual support together with an extensive National Daily Press Advertising campaign and point-of-sale material, will ensure that Effico is an evergreen seller.

Continued from p666
HAV virus and provides active immunisation against HAV infections, particularly for those at increased risk, either through travelling to or living in areas of high endemicity, including Africa, the Far and Middle East and Central and South America, and for close contacts of infected persons.

Two 1ml doses given into the deltoid or gluteal muscles two weeks to one month apart provide antibodies for a year. A booster dose at six months to a year after the initial dose is said to provide immunity for up to ten years.

Vaccines providing protection against hepatitis B infection have been available for several years. In the UK, the vaccine is available as a suspension of HBsAg produced by yeast cells using recombinant DNA technique (Engerix B, Smithkline Beecham; HB Vax, MSD).

The vaccine provides active immunisation for those at increased risk of infection, primarily those likely to be exposed to blood or other body fluids, and those who live in or travel to high endemic hepatitis B areas such as Africa or the Far East.

The immunisation schedule consists of three 1ml doses in the deltoid or the antero-lateral thigh, with the second and third doses at one and six months after the initial one. A paediatric version (Engerix B Paediatric, Smithkline Beecham) was launched earlier this year (Script Specials, July 25).

The place of vaccination within routine immunisation programmes is now the subject of debate within the World Health Organisation, where there are moves towards recommending that hepatitis B vaccination be added to infant vaccination programmes in all countries before the end of the decade.

About 35 countries, mainly in Asia and the Middle East, already have a national policy of immunising infants.

So far, WHO has recommended the targeting of "at risk" groups such as health professionals on the launch of hepatitis B vaccines in developing countries, but the sexual transmission of the disease has meant that epidemics continue to escalate out of control. Widespread childhood vaccination is being increasingly seen as the only answer.

Questions & Answers

A middle-aged man hands you this prescription and asks you to recommend something for summer 'flu; he says he didn't see his normal GP this time and he was told to go home and take some aspirin. Your patient records show that his last prescription one month ago was for 30 Innovace 10mg daily, and your computer alerts you to an interaction between aspirin and ACE inhibitors

1 Why should you check that the prescription for Innovace is correct?

2 What might happen if you don't?

3 What is the interaction between aspirin and ACE inhibitors, and is it clinically significant?

4 Should you take the self-diagnosis of 'flu at face value?

1 Innovace is a combination of 20mg enalapril and 12.5mg hydrochlorothiazide which

should be prescribed only after stabilising the doses of the component drugs individually.

The evidence suggests this is not the case: the previous prescription was too recent to allow dose adjustment, and was for enalapril alone at half this dose — has Innovace been mistaken for Innovace, perhaps from handwritten notes?

2 The combination of a diuretic with an ACE inhibitor may induce marked hypotension if introduced suddenly, with the result that the patient may collapse within hours of the first dose. The unaccustomed size of the enalapril dose would only make matters worse.

3 The non-steroidal anti-inflammatory drugs promote fluid retention, antagonising the hypotensive effect of anti-hypertensive drugs, and increase the risk of renal failure with ACE inhibitors.

There is also an increased risk

of hyperkalaemia, though this seems more likely with indomethacin than other NSAIDs.

These effects are unlikely to be clinically significant with occasional antipyretic doses (600mg) of aspirin, though the risk from regular treatment with anti-inflammatory doses (4g daily) is more real.

If you are in any doubt, recommend paracetamol, which is an equally effective antipyretic.

4 A syndrome including arthralgia, myalgia and fever has occasionally been reported with ACE inhibitors; other symptoms include vasculitis and rash. The likelihood of 'flu being the correct diagnosis might depend on whether you know of other cases locally, and any temporal association between symptoms and use of enalapril.

If 'flu (or any other respiratory infection) seems likely, take a careful history and follow up after two or three days.

Coffee-call from caffeine heart-land — diabetics not in danger?

We find your article (Coffee-diabetic danger, *Chemist & Druggist* September 26) rather alarmist in its suggestion that caffeine could jeopardise the management of diabetes by causing hypoglycaemic symptoms in the absence of low blood glucose.

In this initial piece of research, presented at the British Diabetic Association conference, participants who had their blood glucose levels maintained at set levels throughout the trial only reported symptoms (which they were asked to measure subjectively) at 3.8 and 2.8mmol/l.

This later concentration is known to be hypoglycaemic, and thus symptoms would be expected.

Furthermore, 400mg of caffeine is equivalent in real terms to between four and six cups of instant coffee consumed at once and, as coffee is a stimulant, the symptoms experienced could well have been those of over-stimulation by this very large dose of caffeine.

The symptoms of hypoglycaemia may be very similar to those of over-stimulation by large doses of caffeine.

The Coffee Science Information Centre (COSIC) collects, reviews and assesses worldwide research on coffee and health and is not aware of any further research to corroborate these findings. There would seem to be no merit in advocating that diabetic patients maintaining their conditions adequately abstain from drinking coffee.

Correcting offer on Coracten?

Whilst grateful to Xrayser for helping to further publicise Evans Medical's Coracten offer (*Topical Reflections*, September 24), I feel obliged to take issue with the implications that the company has attempted to induce Pharmacists to behave in a "morally indefensible" way.

The mailing in question does not exhort pharmacists to supply Coracten on all open, slow release nifedipine scripts, but only against those generically written prescriptions where the dosing schedule is twice daily.

If GPs really intend patients to receive a particular brand of product when they write a prescription, the only way to ensure this is to specify the brand name. By prescribing generically, the GP is implicitly leaving the choice of preparation to the professional judgement of the pharmacist.

The trend towards generic prescribing seen in recent years

is a result of the increased cost-consciousness of doctors. Therefore, it is reasonable to assume that the prescriber intends the patient to receive the least expensive product available. In the case of a generic prescription for nifedipine SR 10mg or 20mg bd, I suggest Coracten most closely fits the intention of the GP.

Evans Medical

Validating homoeopathy scientifically

Dr Fisher's claim that homoeopathy has been validated by good-quality clinical trials (*C&D* October 3, p615) is misleading.

He refers to a "meta-analysis" published in the *BMJ* in 1991¹, which is in fact not a meta-analysis but a literature review of controlled trials published over a 25 year period. Of the 107 trials discussed, only 22 are described by the authors as good-quality, and 15 of these 22 show a positive effect of the homoeopathic remedy.

The gold standard of clinical research is not a controlled trial but a properly randomised controlled trial. Hill and Doyon² found 40 properly randomised control trials published over a 25 year period. Of these, only three are described as good-quality, only one of these shows a positive effect. Two of the papers Dr Fisher mentions require further comment. His own paper on *Rhus Tox* for fibrositis³ has a flaw in the statistical analysis as described by Colquhoun⁴ a re-analysis shows no firm evidence for a positive effect. The oft-quoted study by Reilly *et al*⁵ of pollen in hayfever is also flawed because one third of the subjects failed to complete the trial.

Community pharmacists are already bombarded with

misinformation from manufacturers and advertisers, the last thing we need is improperly researched review articles.

In league with the Government

I was amazed to read of Mr Allen's naivety (*Letters* October 3). There is now only one professional body that puts the consumer first, and that is the Royal Pharmaceutical Society. All other bodies support the members they represent, and place that duty first, second and last in order of priority.

It is the excessively altruistic nature of our Society that has landed community pharmacy in the mess it is now in. Its failure to support the Pharmaceutical Services Negotiating Committee and to accept any responsibility for the fiscal effect their rulings have on the membership have shown the Government the best way to attack us. Government simply presents its "desired result" to the Society as a benefit to the consumer, and the RSPGB will promptly instruct us to comply, regardless of cost.

Independents under threat: some survival hints

The future will be rosy for independent pharmacists if they join together and pull each other out of trouble, said Hassan Argomandkhah, founder of the pressure group Rescue the Independent Pharmacist, last Sunday.

"We independents may be single-voiced but united we have more voice than all the multiples put together," he said. But the 6,500 independents were under threat, he warned, and if current trends continued they would soon be in the minority.

"If two pharmacies in close proximity are doing badly, it's better that they get together to help each other rather than being at each other's throats and both of them closing down," he suggested.

In such cases it might be a good idea to close one of the two pharmacies, compensate the owner and form a partnership, giving the surviving pharmacy a second pharmacist allowance to employ the person whose business had closed down. This rationalisation could be funded by the Department of Health.

The advantages would be that the local population would not be deprived of a pharmacy and there would be adequate coverage for extended roles like domiciliary visits to the elderly and infirm.

The second pharmacist allowance would easily pay for itself with the money saved by reducing drug wastage in patients' homes. Having two pharmacists per pharmacy would also reduce the risk of mass unemployment as independents were forced to close.

Mr Argomandkhah was speaking at the Young Pharmacists' Group southern regional conference whose theme was "The demise of the independent community pharmacist?". John D'Arcy, pharmacist administrator at the National Pharmaceutical Association, set the scene by examining all the factors threatening independents. These included the growth of the multiples, doctor dispensing, cuts in remuneration, the possible removal of contract limitation and the National Audit Office report which recommended a 25 per cent reduction in the number of pharmacies — most of which would be independents.

Boots, he thought, were a major threat to all pharmacies. "They are like a giant awakening from a deep sleep and are becoming very, very aggressive," he warned. They were determined to regain their share of NHS

Speaking at a Young Pharmacists' Group conference on Sunday, Hassan Argomandkhah looked at the possible demise of independent pharmacists and gave some hints for survival

John D'Arcy: sets the scene for the YPG southern region conference

dispensing which had fallen from 17 per cent to 11 per cent during the past five years.

Boots were also opposed to regulations controlling entry into NHS pharmaceutical contracts which to some extent had protected independents. They seemed to be applying for contracts which were unnecessary and undesirable, he said, quoting an application in South London where there were already 21 pharmacies within a one mile radius.

Anti-competition?

"One tends to wonder why," he said. "Are they testing the regulations because they want to go to the Department with lots of contract refusals and claim that this is anti-competition?"

Boots also ran some pharmacies with no NHS contract; was this another political ploy to enable them to say to the Department that they were having to turn patients away because those branches could not dispense prescriptions? Or were they trying to squeeze the OTC business from other pharmacies then move in as these other businesses closed down?

Unlike independents, the multiples were protected from the erosion of dispensing margins because, with their huge buying power, they could obtain better margins on drugs. This enabled them to offer additional services such as monitored dosage systems and still survive.

Independents had had some protection from remuneration cuts by judicious buying of

discounted generics and parallel imports, but this facility had gone with the recent reductions in Drug Tariff prices.

The increase in doctor dispensing was another threat, Mr D'Arcy continued, and the current regulations — which were heavily stacked in favour of doctors — should be re-assessed as there was ample evidence that most people could get to a pharmacy as easily as to a doctor.

Mr D'Arcy felt the key to survival would be for pharmacies to get extra payments for the extra services recommended in the Joint Working Party report on the future of the pharmaceutical services.

Mr Argomandkhah agreed that the future lay in extended roles and not just in "sticking labels on bottles". He believed the profession should discuss with the Department a suitable deadline for implementation of the Working Party's proposals, for which extra remuneration should be negotiated, and the Royal Pharmaceutical Society could instigate further education and training.

A solution to the problem of unequal discounts and clawbacks could be to devise a system whereby all pharmacies obtained drugs at the same price. The multiples wouldn't like it but the manufacturers would because they would not need to sell more cheaply to the multiples.

He reiterated his plea for a more open style of negotiation by the Pharmaceutical Services Negotiating Committee and more consultation with the

pharmacists they represented.

Likewise, independents should play a more active part in PSNC elections and in making their views known to their local PSNC representative.

Some solutions

Mike Rudin, Tesco's pharmacy superintendent, gave independents some hints for survival. Firstly they should draw up a business strategy for the short and long term.

They should look at their business "like they've never done before" and decide whether it was what the public wanted and whether it conveyed the right professional and retail image, he said.

Independents should invest in the future, even if it meant taking less profit in some years. For example it might be necessary to invest in a monitored dosage system in order to compete with others offering such a service.

Pharmacies with low dispensing might consider devoting extra space to health screening or concentrate more on OTC sales, but not to the detriment of providing areas for counselling for which they were likely to be paid in future. If the premises were small, an option might be to go for residential and nursing homes business.

Mr Rudin did not think the Government would make available additional money overall but that those pharmacies providing extra services would get more money than those that did not.

Pharmacists should advertise and market their businesses, using the facilities provided by the NPA, possibly advertising jointly with other colleagues. They might also consider doing a deal with other pharmacies on price cutting; rather than indulging in price wars they could get together to decide a mutual pricing structure.

"Accept that profit is not a dirty word," he said. "People will come to you because your professional service is excellent not because you're cutting prices. If you don't make a profit the excellent service may not continue."

Merging pharmacies, franchising the business out to another pharmacist or operating a Tesco concession were other options for survival, he said.

It was also vital to keep up to date with what was happening in pharmacy, what the Government was doing and what the Society was thinking, and to make one's voice heard with professional organisations.

NOW YOU CAN
BUILD UP YOUR CUSTOMER
TRAFFIC – AND STILL
AVOID THE QUEUES

John Richardson
Computers Ltd

Running your pharmacy successfully is a balancing act.

To improve profitability, you must increase customers and their spending rates. But you must be able to cope with these increases and with the extra work.

So how can you increase customer traffic, maximise profit opportunities **and** still attend to your other duties?

JRC can help you achieve the balance by providing you with Labelling, PMR and EPOS systems. All have features designed especially to save you time, money and effort – leaving you free to concentrate on what you do best: being a pharmacist and looking after your customers.

Designed by a pharmacist for pharmacists, JRC systems are flexible and easy to use. All have massive data storage capacity which doesn't reduce operating speed. Built-in stock management helps reduce stock levels, dead stock and lost sales – giving you increased profits and more money in the bank. Systems can easily be upgraded and you retain your freedom to change to any supplier, whenever you choose.

So, to increase profits and reduce the time it takes to earn them, talk to JRC – the best in products and service from the leading name in pharmacy systems.

AAH bid IR£25 million for Dublin based Cahill May Roberts Group

AAH Holdings have made an agreed bid worth IR£25 million for the Irish wholesaler group Cahill May Roberts. The precondition that the directors undertake to sell their 54 per cent stake in the company has already been met.

Under the terms of the deal, AAH swap ten new AAH shares for every 51 CMRG shares. There is also a partial cash alternative: IR£0.87 cash for each CMRG share, for up to 25 per cent of the company.

CMRG's chief executive Paul Higgins told *C&D*: "We have had strong and warm assurances that the company will continue to be run by the existing management, with the focus on meeting the need of our agency and pharmacist customers in Ireland. This was the key factor in our acceptance of the offer."

He said the price offered was also attractive.

When *C&D* asked if CMRG would take over the Vantage franchise business, currently operated by rival Dublin wholesalers United Drug, if the

bid went through, he said: "That would be a logical follow through, as and when it becomes appropriate to do so."

However, United Drug's chairman, Jerry Liston, rebutted the idea, saying: "We have a contract with AAH."

CMRG will have to seek clearance from the Monopolies and Mergers Division of the Department of Commerce in the Irish Republic.

AAH Holdings finance director Andrew Wallace told *C&D*: "AAH is not represented in southern Ireland in the business of wholesaling pharmaceuticals. This bid will give us some scope for synergies and CMRG is a company with a good record, with a similar profile to our business."

He said it is not true that AAH would sell the non pharmaceutical businesses of AAH, but agreed that United Drug's bid for Alchem "might have been a catalyst to some extent."

AAH are keen to keep on the

existing management at CMRG including the existing executive directors. The company does not expect any opposition from the Monopolies and Mergers Commission.

• AAH have bought the four pharmacies of Herdman Chemists.

They have also bought two independent pharmacies in Ferndown, Dorset, and Westcliffe-on-Sea, Essex. The Herdman chain is located in the Newcastle upon Tyne area.

AAH are paying a total of £1.7 million for the six pharmacies, which will trade as part of the company's Vantage chain.

The payment for the pharmacies will be in the form of £1,265,000 in cash plus 90,726 ordinary AAH shares. A further sum of not more than £400,000 will be payable in cash once the net asset values have been established.

• AAH are closing their Luton branch at the end of November. The company is transferring the business of this OTC depot to other branches.

"I can't say exactly how many redundancies there will be, but it is under 100," said an AAH Pharmaceuticals spokesman.

The distribution and ordering facilities are being relocated at AAH's Weedon, Southampton, Warrington and Bristol branches.

"We have informed our customers and suppliers that the changeover is taking place in the second part of October and in November," say AAH.

"It is a part of the company's rationalisation of its depots. It is no secret we are building a new Glasgow depot to take in both our existing Glasgow branches.

"It is all part of the rationalisation programme to make us lean and fit for the future."

Salt of the earth

The Midlands based orthopaedic, ostomy and medical textile products company Salt & Son have bought Bucknall & Dow for an undisclosed sum.

Bucknall & Dow make orthotic products. These are products used to correct or stabilise a deformity. Examples are calipers, orthopaedic splints, and back braces.

Salts chief executive, Philip Salt said: "With Bucknall & Dow we can show our continued commitment to the healthcare industry in the north west. The recent acquisition has not only meant that we can retain the existing skilled staff, but enables Salts to recruit key personnel in order to expand services at the Merseyside branch."

The family salt: (from left to right) Philip Salt, chief executive, Arthur Salt, chairman, Peter Salt, managing director, Ian Spencer, General manager

MSD Agvet celebrate UK centenary for Merk & Co

Chief guest and speaker MAFF Minister John Gummer(right) is welcomed to MSD Agvet's centenary dinner by Mel Brewer, director UK & Eire(left). Guest Roger Cook, director National Office of Animal Health looks on

"Profits are not obscene; it's what you do with them, and what you do with success," the Minister of Agriculture, Fisheries and Food John Gummer told guests at MSD Agvet's centenary dinner.

Mr Gummer commended MSD Agvet on their track record of "spending on the future" to fund research and development to find "drugs for a better tomorrow".

In particular Mr Gummer highlighted MSD Agvet's 1992 decision to give ivermectin in

perpetuity to countries where river blindness is endemic.

• MSD Agvet is actually hosting the UK centenary celebrations of its parent company, Merk & Co, the world's largest pharmaceutical company. To mark the year the company has sponsored the charity Sightsavers, who have run a young journalist of the year competition to highlight the fight against river blindness. Pooja Harijan of Leicester won.

Superdrug continue fight for right to cut perfume prices

Superdrug have hit a further obstacle in their bid to sell premium perfumes at less than the producers' recommended retail price. Consumer magazine houses have refused to take advertisements for the cut price fragrances.

Superdrug's buying and marketing director Geoff Brady says: "The decision of four groups of magazine publishers to ban from their pages our £250,000 campaign for lower priced fragrances is a clear case of pressure being applied by the perfume companies. They have leant on the media owners and it smacks of protectionism and self-interest."

Currently some 15 Superdrug

branches sell fragrances, and on November 1 five more will be added to the list, at Northampton, Wolverhampton, Thurrock, South Shields, and Newport, Gwent.

A Superdrug spokesman told C&D: "We are forced to buy our perfumes on the grey market by the refusal of fragrance houses to supply us direct." However, he emphasises that the grey market is "legitimate wholesalers selling to us legitimately, but without the authorisation of the fragrance houses."

In practice this means Superdrug often get the product the wholesalers are finding hard to shift, but Superdrug are bullish about their position. "For

example, we have been able to get hold of "Escape" by Calvin Klein."

The company is particularly conscious of Boots' position in the perfume trade, who they estimate to have around 35 per cent of the market.

Superdrug say they have recently spent some £30 million refurbishing and opening new stores: "Having spent this money on our stores, our best stores are equal to any of our competitors, such as Boots."

Superdrug have complained to the Office of Fair Trading that they are not being treated fairly by the fragrance houses. "They are looking into it to see whether they should investigate further."

Guest speaker at the BAPW half year meeting, Glaxo finance director Adrian Hennah (right), spoke of Glaxo's commitment to work more closely with BAPW members on the operation of their agency scheme. Pictured with Mr Hennah are (left to right), David Lawrence, agency relations manager, Terry Norman, Glaxo's head of pharmacy and distribution, Michael Watts, director of the BAPW, and David Taylor, BAPW chairman

Wellcome swallow Welgen

Wellcome's US subsidiary Burroughs Wellcome have bought out its partner in a biotechnology joint venture.

The company has acquired the other half of Welgen Manufacturing from GI Manufacturing, its former partner in the venture, for \$24 million.

Welgen makes the hepatitis B and hairy cell leukaemia vaccine Wellferon.

Charters from the taxman

HM Customs and Excise have published charters for VAT and for Excise and Inland Customs. They follow the Taxpayers' Charter published last year.

The VAT charter explains:

- Traders' rights and Customs' responsibilities
- The quality of service traders can expect
- What happens during visits to traders
- What to do if you disagree or have a complaint
- How Customs will publish results.

The VAT Charter will be sent

out to all traders with their VAT returns.

The Excise and Inland Customs Charter will:

- Detail improvements in provision of information
- Give commitments and lay down standards for replying to inquiries
- Give advice on how to complain
- Explain the policy of simplifying standard regimes
- Commit Customs to publishing its results.

This charter will be sent to all traders and be available from local advice centres.

Fisons part with US chief

Stephen Attwood, the head of Fisons' US operations, has resigned as president of Fisons Corporation and as a director of the group's pharmaceuticals board.

Fisons have been quoted as saying the departure was entirely amicable. However, Mr Attwood's resignation takes place against a decline in first half profits and the failure, in May, of both the eye treatment Opticrom and asthma treatment Tilade to regain FDA approval.

Aboutpeople

McElnay is new face on PSNI Council

Dr James McElnay has been elected to the Council of the Pharmaceutical Society of Northern Ireland for the first time. He takes the place of Mr Samuel Simpson who was not re-elected.

The current president Robin Holliday was re-elected along with Mr Harvey Galbraith, Dr J.D.G. O'Hare, Mr Josh Kerr, and Mr Ronnie McMullan.

Dr McElnay is a Reader at the Pharmacy Department of the Queen's University of Belfast.

NPA students success

Some 33 students who successfully completed the NPA's Dispensing Technician's correspondence course have gone on to pass the Society of Apothecaries Dispensing Technician's examination.

The successful candidates are: S.M. Anderson; S. Beard; A. Beattie-Phipps; J. Bennett; A.B.T. Bonnar; R.H. Bower; M.W.R. Crabtree; A. Derby (who intends studying pharmacy at Sunderland); J.A. Douglas; C.M. Evans; S.E. Evans; N. Glynn; H.J. Graham; T. Griffiths; T.J. Grimsey; M. Hindle; J. Hodgetts; L.A. Hunter; M.S.W. Johnston; H. Mathers; D.K. Mitchell; B.J. Onions; E. Pickersgill; N. Reid; D.C. Ross; J.I. Shearing (a previous winner of the Marion Merrell Dow Best Task Sheet Award); K. Stenson; K.M. Taylor; E. Thompson; S.S. Washington; T.A. Woodcock; M. Donaldson; H. Maunsell.

"I am delighted by the success of our students," said Mrs Ailsa Benson, head of training at the NPA. "They have had tremendous commitment to their work and study over the two years and they all deserved to do well."

Mr and Mrs Chris Parker, from Liverpool, were the winners of the recent "Generics for Gold" promotion by Spectrum Generics. They are pictured about to enjoy their prize of a day out on Concorde and the Orient Express

Whitley Council resignation

Bob Timson has resigned as chairman of the staff side of Pharmaceutical Whitley Council following his part-time appointment as acting regional pharmacist for Trent Regional Health Authority.

Mr Timson was president of the Guild of Hospital Pharmacists from 1981 to 1984, and has been chairman of staff side of the Whitley Council since 1984.

During his period of office two major new agreements were negotiated — an emergency duty agreement and a new pay and grading structure.

The post of chairman will be filled by V'Iain Fenton-May, currently vice-chairman. Mr Fenton-May is also a former Guild president, and has been a member of the staff side of the Whitley Council since 1982.

Bath School to develop pharmacy courseware

Bath University's School of Pharmacy and Pharmacology is to lead a major project to develop courseware for use within all of the 16 Schools of Pharmacy in the UK.

The programme aims to develop "courseware" which will assist and improve undergraduate teaching in Schools and encourage them to work to a common standard. The proposed courseware will be of four types:

- Material to reinforce lecture

notes, particularly aiming to even out differences in knowledge between first year students.

- Material to support tutorial and workshop classes, which will be of special value to pharmaceutical sciences which have a numerical content.

- Computer-simulated experiments to replace or extend practical classes which are at present restricted on financial, ethical or practical grounds

- Materials relating to the professional aspects of pharmacy.

Pharmacist Abraham Batchat of Hills Chemist, 161 New Cross Road, London was a winner in the Pizazz Sport free draw, held at Chemex. He is pictured receiving his prize of a customised golf bag from Michael LeFort junior, business development manager

APPOINTMENTS

Dr Jean-Pierre Garnier, president, North America Pharmaceuticals, has been elected to the board of directors of Smithkline Beecham Plc.

Cyanamid of Great Britain have appointed **Mr Mike Schlumpf** as deputy managing director.

Claire Feasey has been appointed to AAH Pharmaceuticals' Link salesforce as a salesperson. She will be based at the company's Leeds branch.

Janine Baker has been appointed PR manager for Syntex Pharmaceuticals Ltd.

Pharmadass Ltd, suppliers of the Health-Aid range of vitamins and cosmetics, have appointed **Andrew Waide** as sales and marketing manager.

Sir James McKinnon has joined the board of Scotia Holdings, formerly Efamol Holdings Plc, as a non-executive director.

Dr Tomris Turmen has been appointed as director of the Division of Family Health at the World Health Organisation.

ROBINSON EASY BREATHERS FOR NASAL CONGESTION

The most exciting innovative product to hit the £40m decongestant market for years.

Based on the latest advances in impregnated tissue technology.

Backed by research, Easy Breathers are designed and packaged for today's consumer.

Refreshing, Clean, Hygienic, Discreet and Convenient.

One Pack can be used by the whole family anywhere, any time.

Supported by a powerful and penetrating £250,000 consumer launch campaign through, Winter 1992/1993.

Who makes what: a unique source list

This C&D Generics Supplement not only lists new seven-digit PIP Code, but also provides buyers with a unique source list for unbranded lines in pack sizes ranging from counter and dispensary to small-scale manufacture.

The list is arranged so that users can trace alternative suppliers easily, and at the same time have the relevant PIP Code for ordering and product identification. Entries are updated in the weekly Price List Supplement when changes are notified to C&D by manufacturers. C&D would be pleased to receive details of any packs not currently listed and for which codes are required.

As far as possible, the following compilation rules have been observed:

1. In converting from six to seven digit PIP code, a zero has been placed before the old number, thus retaining the existing check digit.

2. New PIP Codes are allocated randomly as under the six figure system and start with "1".

3. In the interest of continuity, priority in reallocation of existing codes has been given to suppliers whose products carry the PIP Code on their packs.

4. Entries are generally under pharmaceutical name in order to bring all suppliers together for maximum buyer choice. However, counter packs will often be labelled with a popular synonym (eg Gee's linctus, Whitfield's ointment). A cross-reference has been provided whenever products are shown under a synonym in suppliers' lists.

5. The "DT" symbol indicates Drug Tariff pack sizes.

The PIP Code

History

The benefits of a common code for pharmacy products have been long recognised, and over the years various working parties recommended the creation of such a code. In 1982 the National Pharmaceutical Association, in conjunction with Benn Publications (publishers of *Chemist & Druggist*), created the PIP Code in which they now hold joint copyright. This move had the support of several major pharmaceutical wholesalers.

Definition

The PIP Code is a product identifying number which has been allocated to goods distributed through pharmacies. All types of products are included and every pack size and colour or other variation has its own unique PIP Code number. The codes are published alongside each product entry in the *Chemist & Druggist* monthly Price List and weekly supplements, ensuring that a readily accessible and up to date PIP Code reference is widely circulated.

Initially, a six-digit code was chosen for ease of keyboard entry, but demand for the PIP coding system has necessitated the introduction of a seven-digit code. The last of these digits is a check digit (see p5) to minimise errors in recording.

Uses

The individual computer systems operated by manufacturers, wholesalers and retailers can be interfaced to recognise the PIP Code, which therefore provides a common language. This enables the retailer to

retain a freedom of choice of supplier and makes it possible for all involved in the distribution chain to benefit from streamlining their communications and merchandise handling systems.

Initially the PIP Code was used mainly as an interface between retailer and supplier for the purpose of placing and receiving orders, and virtually all pharmaceutical wholesalers can now recognise PIP Code when transmitted electronically. However, within retail pharmacy it is used increasingly for stock control and point-of-sale data capture. Most computer bureaux handle PIP Code data for clients, and many EPOS and dispensary systems make use of the PIP Code facility.

Computer users who choose to adopt the PIP Code as the primary code for their systems can avoid the time and expense of maintaining their own database. This is a considerable advantage to smaller businesses and pharmacies which have only limited clerical resources.

Developments

Requests for further information on the Code's use, details of data formats etc, and licence applications should be addressed to:

Mr Brian Dosser, FCA
PIP Code Administrator
National Pharmaceutical Association
Mallinson House
40-42 St. Peter's Street
St. Albans
Herts AL1 3NP
Tel: 0727 832161

PIP Code principles

The Pharmaceutical Interface Products Code Regulatory Authority is the National Pharmaceutical Association, which takes advice from a technical panel representing retail and wholesale PIP Code users, plus *Chemist & Druggist* and Fairsan (who maintain the NPA's master PIP Code file).

The code is based on computer codes used to maintain the *C&D* Price Service but has been augmented to incorporate a number of product categories not considered appropriate for publication in the *C&D* monthly Price List (such as some watches, confectionery, stationery).

Code users may find the following points of policy helpful:

General

1. Manufacturer and distributor codes are published in Section 2 of the *C&D* monthly Price List.
2. Within the seven-digit PIP Code, codes in the 600-0000 range have been reserved for users' own requirements, but some wholesalers have allocated part of the series to "service" items such as bags and bottles. Retailers should obtain details of such allocation from their usual suppliers before using this series as dump codes etc.
3. Discontinued items are deleted from the *C&D* Price List upon notification by the manufacturer but remain on the master file for a period of at least 18 months before their codes are used for another product. If a product is re-marketed by the same supplier within that period, every effort is made to use its former code.
4. Where there are minor adjustments to pack sizes the existing code is generally retained to help retailers monitor sales performance.
5. Both main and variant codes can be issued in advance of product launch with full security and confidentiality. The allocated numbers are reserved on the *C&D* and master file computers pending advice of launch. Manufacturers of ethicals are particularly asked to use this facility so that codes can be notified on their standard letter to wholesalers. Intercontinental Medical Statistics (IMS) and *Chemist & Druggist* have available a joint form (approved by ABPI and BAPW) for prior allocation of both SDA and PIP codes.

Variants

6. Products which have no variants (colour, flavour, etc.) are identified by a separate "main" code for each pack size, representing singles wherever possible. This code appears immediately before the trade price column in the *C&D* Price Service.
7. Where products include variants the "main" code does not appear - instead there are individual codes in italic type beneath the entry. However, a "main" code is still used by the *C&D* and Fairsan computers and can be obtained by application to either party. (This code may be used as a retailer dump code for example, but will not be recognised by wholesalers for ordering purposes.)
8. Where variants are added to an existing range the "main" code will normally be retained as the variant code for the original version. If this variant is subsequently discontinued its

code will remain the "main" code but will no longer be published.

Special cases

9. PIP codes for unbranded products are shown in the *C&D* Generics Supplement, distributed free to all *C&D* subscribers. This supplement also lists wholesalers accepting PIP Code for ordering purposes.

Note: Branded generics (ie, where a prescription calling for the brand name alone is sufficient to identify absolutely the product required) are to be found in the *C&D* Monthly Price List.

10. Certain surgical/sundries groupings are at present not fully covered by PIP Code. This applies particularly to products (eg ostomy and incontinence) where the multitude of size and type variations is great, and/or product developments are frequent, so that retailers are likely to rely on manufacturers' product number or full description for ordering from a wholesaler. However, some of the more standard and frequently prescribed brands and generic items (eg many NHS appliances) are coded in the *C&D* Price List and the Generics Supplement. With the introduction of a seven-digit PIP Code it is proposed to extend coverage to these product areas as soon as possible.
11. Products normally restricted to hospitals are indicated IIP. Products are coded if manufacturers anticipate them being prescribed to out-patients.
12. Promotional, temporary and seasonal packs are not coded: retailers and wholesalers should use the 900-0000 & 600-0000 series respectively.

Check-digit calculation

The check (seventh) digit of the PIP Code is arrived at by the following calculation:

1. Take each digit starting with units position then tens position and so forth and multiply by 2,1,2,1,2,1, etc.
2. Add up resultants of 1. (Add the digits not the products ie if resultant is two digits then add them together).
3. Subtract the figure at 2 from the next highest multiple of 10.
4. Answer is the modulus 10 check digit. If no remainder then check digit is zero.

To check

1. Take each digit (including check digit) and multiply by 2,1,2,1,2,1 (starting in units position).
2. Total resultants as before.
3. Answer should be an exact multiple of 10.

Example

$$\begin{array}{rcl}
 & 3 & 5 & 8 & 9 & 2 & 5 & \text{(original number)} \\
 & \times 1 & \times 2 & \times 1 & \times 2 & \times 1 & \times 2 & \text{(multiplicands)} \\
 = & 3 & 10 & 8 & 18 & 2 & 10 & \text{(resultants)} \\
 = & 24 & & & & & & \text{(sum of digits)} \\
 & & & & 3 & + & 1 & + & 0 & + & 8 & + & 1 & + & 8 & + & 2 & + & 1 & + & 0 \\
 & 30-24 & & & & & & & & & & & & & & & & & & & \text{(subtract from next multiple of 10)} \\
 = & 6 & & & & & & & & & & & & & & & & & & \text{(this result is the modulus 10 check digit)}
 \end{array}$$

Check

$$\begin{array}{rcl}
 & 3 & 5 & 8 & 9 & 2 & 5 & 6 & \text{(PIP code number)} \\
 & 3 & 10 & 8 & 18 & 2 & 10 & 6 & \text{(resultants)} \\
 = & 30 & & & & & & & \text{(sum of digits)} \\
 = & 0 & & & & & & & \text{(correct - exact multiple of 10)}
 \end{array}$$

Coding queries

Coding queries related to products published or to be published in the C&D Price List and Generics Supplement may be addressed to Colin Simpson, Price List Controller, Chemist & Druggist, Benn Publications Ltd, Sovereign Way, Tonbridge Kent TN9 1RW (telephone 0732 364422).

Queries relating to codes held on the master file may be addressed to Colin Bell, Fairscan Management Systems Ltd, 14a High Street, Lyndhurst, Hampshire SO43 7BD (telephone 0703 28 3222).

Matter of policy should be referred to Brian Dosser, PIP Code Administrator, National Pharmaceutical Association, Mallinson House, 40-42 St. Peters Street St. Albans Hertfordshire AL1 3NP (telephone 0727 832161) from whom printouts of the master file in alphabetical or numerical order may be purchased. The PIP Code copyright is owned jointly by Benn Publications Ltd (publishers of *Chemist & Druggist*) and the National Pharmaceutical Association.

Technical panel

The PIP Code technical/consultative panel, set-up by the National Pharmaceutical Association to advise it on code maintenance and development, is chaired by Mr Brian Dosser of NPA and has the following members: Colin Bell (representing Fairscan Management Systems, (who maintain the PIP Code master file), Mary Allen (NPA information department), Ron Salmon (Publisher of *Chemist & Druggist*, responsible for issue of PIP Codes and their publication through C&D Price Service), Colin Simpson (C&D Price List Controller), Brian Hopkins (a community pharmacist), Jeff Thomas (representing Rowland & Co), Nimish Patel (a community pharmacist), Nicola Emmett (representing Evans/Kerfoot), Derek Howarth (representing AAI Pharmaceuticals).

Chemist & Druggist Monthly Price List and Weekly Price Supplement are available on disk. The database and update services, which are intended primarily for wholesalers and EPoS suppliers for onward transmission to clients, include information such as EAN codes which cannot be reproduced in the printed versions. For details of costs and formats ring Colin Simpson on 0732 364422.

DISALLOWED DRESSINGS AND APPLIANCES

A comprehensive guide to both proprietary and non-proprietary items for which payment will not be made if dispensed against NHS prescriptions issued in England and Wales. Derived from the lists used by the PSNC Prescription Research Centre it includes extensive cross-referencing for quick access to particular products.

A			
Abbotts T connector		-stocking with mitten	Bosch nebuliser Wicks
Abdominal binder		-support	Bottle -brush
Abdominal supports		-knee pads	-plastic for micturition
Absorbent pads		-pads	-sample
Absorbex		Artificial breast	Bougre unmedicated
